Reading, Writing, and the Rhetorics of Whiteness Wendy Ryden, Ian Marshall, 2013-03 In this volume Ryden and Marshall bring together the field of composition and rhetoric with critical whiteness studies to show that in our post race era whiteness and racism not only survive but actually thrive in higher education As they examine the effects of racism on contemporary literacy practices and the rhetoric by which white privilege maintains and reproduces itself Ryden and Marshall consider topics ranging from the emotional investment in whiteness to the role of personal narrative in reconstituting racist identities to critiques of the foundational premises of writing programs steeped in repudiation of despised discourses Marshall and Ryden alternate chapters to sustain a multi layered dialogue that traces the rhetorical complexities and contradictions of teaching English and writing in a university setting Their lived experiences as faculty and administrators serve to underscore the complex code of whiteness even as they push to decode it and demonstrate how their own pedagogical practices are raced and racialized in multiple ways Collectively the essays ask instructors and administrators to consider more carefully the pernicious nature of whiteness in their professional activities and how it informs our practices

Edwardsson, 2023-12-05 In *Radical Betrayal* Anders W. Edwardsson delivers a provocative examination of how both liberal and neoconservative forces have undermined American exceptionalism the belief in America's unique character and role in world history Tracing the evolution of American national identity from its founding through the present day Edwardsson argues that the post World War II era has witnessed a gradual erosion of the principles that once defined the American experiment From Woodrow Wilson's progressive idealism to Franklin Roosevelt's New Deal from Lyndon Johnson's Great Society to George W. Bush's democratization agenda Edwardsson methodically chronicles how political leaders have dramatically expanded federal power and global interventionism in ways that contradict America's founding vision The author demonstrates how both parties have contributed to what he sees as America's decline liberals through welfare state expansion and neoconservatives through misguided foreign wars Most provocatively Edwardsson argues that Donald Trump's presidency represented a potential return to traditional American principles before being undermined by establishment forces He warns that continued abandonment of American exceptionalism threatens not only the nation's prosperity but its very survival as a unified republic Whether you agree with his analysis or not Edwardsson's sweeping historical narrative challenges readers to reconsider the forces shaping American politics and identity in an increasingly polarized age If you enjoyed *The Case for Nationalism* by Rich Lowry *The Dying Citizen* by Victor Davis Hanson or *America in Retreat* by Bret Stephens you'll love *Radical Betrayal* *A Conceptual History of Psychology* Brian Hughes, 2022-11-17 What is modern psychology and how did it get here How and why did psychology come to be the world's most popular science *A Conceptual History of Psychology* charts the development of psychology from its foundations in ancient philosophy to the dynamic scientific field it is today Emphasizing psychology's diverse global heritage the book explains how across centuries human beings came to use reason empiricism and science to explore each other's thoughts feelings and behaviours The book skilfully interweaves conceptual and historical issues to illustrate the contemporary relevance of history to the discipline It shows how changing historical and cultural contexts have shaped the way in which modern psychology conceptualizes individuals brains personality gender cognition consciousness health childhood and relationships This comprehensive

The Material of World History Tina Mai Chen, David S. Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist

cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes
