Artificial Intelligence for Virtual Reality Jude Hemanth, Madhulika Bhatia, Isabel De La Torre Diez, 2023-12-04 This book explores the

possible applications of Artificial Intelligence in Virtual environments These were previously mainly associated with gaming but have largely extended their area of application and are nowadays used for promoting collaboration in work environments for training purposes for management of anxiety and pain etc The development of Artificial Intelligence has given new dimensions to the research in this field      **Advances in Artificial Intelligence, Robotics, Augmented and Virtual Reality in Neurosurgery** Mohammed Ali Alvi,2024-03-18      **Artificial Intelligence in Real-Time Control 1991** M.G.

Rodd,G. J. Suski,2014-05-23 This set of proceedings contains the most significant papers presented at the third IFAC Workshop on Artificial Intelligence in Real time Control which was held from September 23 25 1991 in the USA In this workshop although there were still some exotic applications a more practical view of the applications and limitations of current AI technology dominated the participants discussions With its resultant focus on reliability and safety considerations the workshop posed as many questions as it answered It provides an excellent mirror of the current state of the art which these proceedings are intended to illustrate      **Considerations on the AI Endgame** Soenke Ziesche,Roman V.

Yampolskiy,2025-03-20 This seminal volume offers an interdisciplinary exploration into the rapidly evolving field of artificial intelligence and its societal implications Written by leading scholars Soenke Ziesche and Roman V Yampolskiy the book delves into a multitude of topics that address the rapid technological advancements in AI and the ethical dilemmas that arise as a result The topics explored range from an in depth look at AI welfare science and policy frameworks to the mathematical underpinnings of machine intelligence These subjects include discussions on preserving our personal identity in technological contexts as well as on the question of AI identity innovative proposals towards the critical AI value alignment problem and a call to merge Western and non Western approaches towards universal AI ethics The work also introduces unconventional yet crucial angles such as the concept of ikigai in AI ethics and a pioneering attempt to map a potential AI driven ikigai universe as well as the role of design formalisation or Designometry in the creation of artefacts By offering a balanced mix of theoretical and applied insights the book serves as an invaluable resource for researchers policymakers and anyone interested in the future of AI and the extent of its impact on society      **Pediatric Dentistry: Embracing Emerging Practices for Kids' Oral Health** Dr Nitin Sharma,2023-04-16 Embrace the emerging practices in pediatric dentistry with this guide dedicated to children s oral health Covering the latest techniques and treatments this book is a must have for pediatric dentists committed to providing the best care for young patients      **Adaptive Artificial Intelligence** P. Pavan

Kumar,Grandhi Suresh Kumar,Ajay Kumar Jena,Sandeep Kumar Panda,S. Balamurugan,2025-11-12 Master the next frontier of technology with this book which provides an in depth guide to adaptive artificial intelligence and its ability to create flexible self governed systems in dynamic industries Adaptive artificial intelligence represents a significant advancement in the development of AI systems particularly within various industries that require robust flexible and responsive technologies Unlike traditional AI which operates based on pre defined models and static data adaptive AI is designed to learn and evolve

in real time making it particularly valuable in dynamic and unpredictable environments This capability is increasingly important in disciplines such as autonomous systems healthcare finance and industrial automation where the ability to adapt to new information and changing conditions is crucial In industry development adaptive AI drives innovation by enabling systems that can continuously improve their performance and decision making processes without the need for constant human intervention This leads to more efficient operations reduced downtime and enhanced outcomes across sectors As industries increasingly rely on AI for critical functions the adaptive capability of these systems becomes a cornerstone for achieving higher levels of automation reliability and intelligence in technological solutions Readers will find the book Introduces the emerging concept of adaptive artificial intelligence Explores the many applications of adaptive artificial intelligence across various industries Provides comprehensive coverage of reinforcement learning for different domains Audience Research scholars IT professionals engineering students network administrators artificial intelligence and deep learning experts and government research agencies looking to innovate with the power of artificial intelligence

*Digitalization, Sustainable Development, and Industry 5.0* Bülent Akkaya, Simona Andreea Apostu, Eglantina Hysa, Mirela Panait, 2023-11-20 Digitalization Sustainable Development and Industry 5.0 offers cutting edge multidisciplinary research with expert insights on the technologies and strategies businesses use in the twin transition process **Towards**

**Sustainable Natural Resources** Meenu Rani, Bhagwan Singh Chaudhary, Saleha Jamal, Pavan Kumar, 2022-09-08 Natural resources not only contribute to overall growth of the economy but also help reduce poverty by providing employment and food security to populations on the continent and is thus the most inclusive growth sector of the economy of Asian countries Global weather and climate studies are also increasingly being considered a vital source of information to understand the earth's environment in particular in the framework of weather and climate studies land use transformation and human influence across these areas Satellite earth observing systems provide a unique tool to monitor these changes This book includes significant and up to date contributions in the field of sustainable natural resources conservation across the globe While the range of applications and innovative techniques is constantly increasing this book provides a summary of key case studies where satellite data offers critical information to help understand the causes and effects of those environmental changes allowing us to reflect on how to minimize their negative impacts This book is of interest to researchers and practitioners in the field of remote sensing geographical information meteorology and environmental sciences Scientists and graduate to post graduate level students in environmental science will also find valuable information in this book Edge

Intelligence in the Making Sen Lin, Zhi Zhou, Zhaofeng Zhang, Xu Chen, Junshan Zhang, 2025-06-11 This book conducts a comprehensive and detailed survey of the recent research efforts in edge intelligence The authors first review the background and present motivation for AI running at the network edge The book then provides an overview of the overarching architectures frameworks and emerging key technologies for deep learning models toward training inference at

the network edge To illustrate the research problems for edge intelligence the book also showcases four of the authors own research projects on edge intelligence ranging from rigorous theoretical analysis to studies based on realistic implementation This second edition incorporates the latest research in this rapidly developing area The authors also highlight the current applications and future research opportunities for edge intelligence

### **Sustainable Healthcare Systems in Africa**

Wasswa Shafik, Adel Ben Youssef, Chithirai Pon Selvan, Pushan Kumar Dutta, 2025-11-11 This book encompasses the development implementation and maintenance of socially environmentally and economically sustainable healthcare systems in Africa amidst the increasing utilization of disruptive technologies This involves integrating technology adopting sustainable practices and effectively managing resources to ensure the long term viability of healthcare services Sustainable Healthcare Systems in Africa Technologies Practices and Management addresses the unique challenges that Africa faces in the healthcare sector and meets the urgent need for detailed healthcare services that consider environmental social and economic sustainability It tackles current challenges and opportunities offering valuable insights that are relevant to the evolving healthcare landscape By presenting practical examples and a solid understanding of sustainable healthcare practices this book provides actionable guidance for healthcare professionals policymakers and other stakeholders Taking a multidisciplinary approach that considers innovation techniques and management as a whole this book recognizes the interconnected nature of these elements and offers a more holistic perspective on building and maintaining sustainable healthcare systems The insights provided in this book will empower healthcare professionals policymakers and other stakeholders with the knowledge and tools necessary to drive positive change It serves as a roadmap for decision makers looking to implement lasting and impactful improvements in healthcare delivery throughout the continent

*Platforms and Artificial Intelligence* Ahmed Bounfour, 2022-03-28 Artificial intelligence AI and platforms are closely related Most investments in AI especially in critical technologies are provided by large platforms This book describes how platforms invest in AI and how AI will impact the next generation of competences following a twofold approach to do so on the one hand the book seeks to understand how platforms for investment in intangibles and AI are organized but on the other hand it provides a framework to describe how AI will change jobs and competences in the future Moreover the book addresses five main themes 1 platforms platformization and the foundations of their business models 2 artificial intelligence technological tendencies and the policy agenda 3 artificial intelligence productivity and the next generation of competences 4 artificial intelligence productivity and the digital divide 5 artificial intelligence ethics and the post truth society The book s content is mostly based on papers presented at the last two installments of the World Conference on Intellectual Capital for Communities It brings together the views of leading scholars and experts on how artificial intelligence and platformization will impact competences in the near future

*Applications of Metaverse and Virtual Reality to Creative Education and Industry* Dana M. Barry, Hideyuki Kanematsu, 2025-05-04 This book provides excellent examples of metaverse and virtual

reality and their unlimited possibilities for education and industry By examining innovative educational activities in both real and virtual worlds such as Second Life SL a three dimensional world where avatars perform specific tasks on behalf of us we get a unique perspective on how these technologies can revolutionize learning and professional practices Metaverse offers a fully immersive and interconnected virtual environment enabling individuals to engage in digital experiences that closely resemble real world interactions thereby providing limitless possibilities for education and industry In addition the chapters cover various key topics including the integration of virtual reality in creative game design the use of VR virtual reality headsets with sensor glasses for physiological data collection and the application of VR in fields like architecture and medical education Artificial Intelligence Robotics and Machine Learning along with other related fields are also mentioned In addition readers will encounter discussions about the future fusion of real and virtual worlds highlighting the role of Digital Twin Technology and Augmented Reality The book invites readers to consider critical questions about the implications of these technologies for society and industry This book is a must read for students educators engineers and researchers interested in the cutting edge applications of virtual reality and the metaverse It serves as a textbook reference and practical guide making it invaluable for academic audiences and professionals seeking to harness the power of these technologies for innovative solutions Whether you are a professor scientist or engineer or simply curious about the metaverse avatars and virtual reality this book promises to be a rewarding journey into the limitless potential of these technologies for creative education and industry

**Philosophy of Reality** Eleanor Hawking,AI,2025-02-12 Philosophy of Reality explores the age old question of what is real by weaving together philosophical frameworks scientific understanding and the intriguing possibility of simulation theory The book navigates diverse perspectives from Plato s Theory of Forms to the mind bending implications of quantum physics highlighting how our perception of reality has evolved over time It delves into the nature of existence consciousness and the interplay between mind and matter ultimately questioning whether our reality is a fundamental truth or a sophisticated illusion The text examines how scientific revolutions like the shift from Newtonian mechanics to Einstein s relativity have reshaped our understanding of space time and the universe It also considers the simulation hypothesis probing the arguments for and against the idea that our world is a computer generated construct Through philosophical analysis scientific data and logical

reasoning the book guides readers through core philosophical concepts advancements in physics and cosmology and the potential implications of living in a simulated reality The book progresses in three parts examining philosophy science and simulation theory concluding with a synthesis that offers a framework for understanding reality     Recent Trends in Intelligent Computing and Communication Pushpa Choudhary,Sambit Satpathy,Arvind Dagur,Dhirendra Kumar Shukla,2025-09-30 This book emerges from the exchange of research insights and innovative ideas in the domains of Artificial Intelligence Intelligent Computing Blockchain Communication and Security With a special emphasis on intelligent financial systems secure transactions real time monitoring and assistive technologies this proceedings compilation serves as a comprehensive resource on technologies shaping the digital era Key features of this book include A wide ranging exploration of current research trends in Artificial Intelligence and Blockchain with emphasis on their integration into secure and intelligent living systems Detailed illustrations of system models and architectures that portray real world AI applications In depth discussions on the practical role of AI and Blockchain in sectors like banking healthcare communication navigation and cybersecurity An analytical perspective on the challenges and future opportunities of deploying AI and Blockchain in healthcare education finance and other industries This book is intended for research scholars academicians undergraduate and postgraduate students Ph D candidates industry professionals technologists and entrepreneurs seeking to deepen their understanding of intelligent and secure systems     Applications of Immersive Technology in Architecture, Engineering and Construction Abhinesh Prabhakaran,Abdul-Majeed Mahamadu,Colin A. Booth,Patrick Manu,2025-06-27 This edited book addresses a gap in literature by advancing current understandings of the applications of immersive technology within the architecture engineering and construction AEC sector Globally the architecture engineering and construction AEC sector makes an enormous contribution to the socio economic development of nations which is primarily evidenced by its creation provision of the built environment The sector has however often been criticised for inefficiencies waste and diverse forms of adverse impacts that are associated with the lifecycle of the provision of built assets design construction operations and maintenance and end of life phases Over the years the inefficiencies waste and adverse impacts have often been a catalyst for calls and initiatives to transform the AEC sector The advent of the fourth industrial revolution commonly referred to as Industry 4 0 which entails the automation and digitalisation of production presents opportunities to leverage emerging technologies to improve the image and productivity of the sector Prominent among the emerging technologies in the Industry 4 0 era is that of immersive technology which includes virtual reality mixed reality and augmented reality The capability of immersive technology to deliver beneficial impacts for multiple construction sector stakeholders throughout the construction lifecycle has been acknowledged within the industry and this continues to stimulate interest amongst practitioners policymakers and researchers Despite this phenomenon at present there is no dedicated compendium of research informed text that focusses on the multifaceted applications of immersive technology throughout the lifecycle of the provision of built

assets right from concept design to end of life This book thus addresses this gap in literature by advancing current understanding of the applications of immersive technology within the AEC industry Readers will understand how the technologies are applied the resulting array of impacts including benefits drawbacks challenges and future directions for applications research and development
