The New Clause:

A Treatise on the Law, Privileges, Proceedings and Usage of Parliament Thomas Erskine May, 1917 *Inductive Logic Programming* Francesco Bergadano, Daniele Gunetti, 1996 Although Inductive Logic Programming ILP is generally thought of as a research area at the intersection of machine learning and computational logic Bergadano and Gunetti propose that most of the research in ILP has in fact come from machine learning particularly in the evolution of inductive reasoning from pattern recognition through initial approaches to symbolic machine learning to recent techniques for learning relational concepts In this book they provide an extended up to date survey of ILP emphasizing methods and systems suitable for software engineering applications including inductive program development testing and maintenance Inductive Logic Programming includes a definition of the basic ILP problem and its variations incremental with queries for multiple predicates and predicate invention capabilities a description of bottom up operators and techniques such as least general generalization inverse resolution and inverse implication an analysis of top down methods mainly MIS and FOIL like systems and a survey of methods and languages for specifying inductive bias Logic Programming series **Federal Register**, 1976
