Was there an advanced prehistoric civilization in ancient Egypt? Who were the people who built the great pyramids and carved the Great Sphinx? Did the pyramids serve as energy devices and not as tombs for kings? Independent Egyptologist Stephen S. Mehler has spent over 30 years researching the answers to these questions and believes the answers are Yes. An indigenous oral tradition still exists in Egypt and Mehler has been able to uncover and study it with the help of a living master of this tradition Abd El Hakim Awyan. He has also been given permission to share these teachings presented heretofore in fragments by other researchers to the Western World. Teachings that unfold a whole new understanding of ancient Egypt. Publisher's description.

Perspectives on the Ancient Maya of Chetumal Bay Debra S. Walker, 2016-10-04. Brings novel synthetic insight to understanding a region that was a hub of waterborne trade and an important locus of production for some of the Maya's most valued crops. Cynthia Robin, author of *Everyday Life Matters: Maya Farmers at Chan*. This one of a kind volume shows us how important this region was to the ancient Maya with detailed and vivid descriptions of sociopolitical and economic organization and their relation to the unique landscape and geography of Chetumal Bay. Laura J. Kosakowsky, author of *Preclassic Maya Pottery at Cuello*. Belize Chetumal Bay is central to discussions of ancient Maya politics, warfare, economy, exchange and communication because of its unique location. Although the ancient Maya invested prodigious amounts of labor in the construction of road systems called *sacbeob* for communication and trade, recent archaeological discoveries around Chetumal Bay in both Belize and Mexico reveal an economic alternative to these roads: an extensive network of riverine and maritime waterways. Focusing on sites ringing the bay such as Cerro Maya, Oxtankah, and Santa Rita Corozal, the contributors to this volume explore how the bay and its feeder rivers affected all aspects of Maya culture from settlement, food production and the production and use of special goods to political relationships and social organization. Besides being a nexus for long distance exchange in valuable materials such as jade and obsidian, the region was recognized for its high quality agricultural produce including cacao, achiote, vanilla, local fruits, honey and salt and for its rich marine environment. The Maya living on the fringes of the bay perceived the entire region as a single resource procurement zone. Waterborne trade brought the world to them providing a wider horizon than would have been available to inland cities dependent only on Maya roads for news of the world. The research reveals that trade relations played a central role in the organization of human social life on Chetumal Bay. Contributors: James Aimers, Timothy Beach, Clifford Brown, Beverly A.
