**Landpower in the Long War** Jason W. Warren, 2019-06-14 War and landpower's role in the twenty-first century is not just about military organizations, tactics, operations, and technology; it is also about strategy, policy, and social and political contexts. After fourteen years of war in the Middle East with dubious results, a diminished national reputation, and a continuing drawdown of troops (with perhaps a future force increase proposed by the Trump administration), the role of landpower in US grand strategy will continue to evolve with changing geopolitical situations. *Landpower in the Long War: Projecting Force After 9/11*, edited by Jason W. Warren, is the first holistic academic analysis of American strategic landpower. Divided into thematic sections, this study presents a comprehensive approach to a critical aspect of US foreign policy: as the threat or ability to use force underpins diplomacy. The text begins with more traditional issues such as strategy and civilian-military relations and works its way to more contemporary topics such as how socio-cultural considerations affect the landpower force. It also includes a synopsis of the suppressed Iraq report from one of the now-retired leaders of that effort. The contributors, made up of an interdisciplinary team of political scientists, historians, and military practitioners, demonstrate that the conceptualization of landpower must move beyond the limited operational definition offered by Army doctrine in order to encompass social changes, trauma, the rule of law, acquisition of needed equipment, civil-military relationships, and bureaucratic decision-making, and argue that landpower should be a useful concept for warfighters and government agencies.

Through rich descriptions of established OEMs and mobility start-ups, it discusses the current forms of mobility and the promise of autonomous technology. It further explores the strategic dimension of these developments so as to navigate and succeed within the disruptive and ever-changing environment of mobility services.

**Europe and the Spectre of Post-Growth Society** Piotr A. Świtalski,2014-05-30 Europe has been going through its most serious crisis of values since the fall of communism In public discourse economic and social pressures have overshadowed the other dimensions of the crisis including societal values However the crisis of values would appear to be more than simply an effect of the recession Europeans have lost trust in democratic institutions at all levels European national and local Rising xenophobia and discrimination against minorities undermine the vitality of the European model of tolerance Europe is plagued by endemic corruption which costs it more than 100 billion annually triggering political instability Some believe that once Europe is back on the path of growth the crisis of values will disappear and that there will be a resurgence of faith in European integration But in the long term growth in Western societies may be impaired by serious headwinds resulting from demographic trends and rising inequalities and Europe may become the first post growth society European societies are already changing their traditional characteristics as a result of exposure to the effects of two global mega trends the empowerment of the individual and cosmopolitisation Can the European project be of relevance when addressing these challenges What role in this process can be played by the Council of Europe which is the embodiment of the idea that Europe is bigger than the European Union and the European agenda is richer than the economy and politics
