The Monsters Of Education Technology:

The Monsters of Education Technology Audrey Watters, 2014 Monsters Dragons Beasts Robots Pigeons We re doomed A collection of talks and tales from education technology s Cassandra this book contains the lectures written and delivered by Audrey Watters over the course of 2014 They offer a glimpse into ed tech s hidden histories horrors ideologies and mythologies What are the powerful stories we tell ourselves about ed tech What happens when the technologies that we build purportedly to enhance teaching and learning become monstrous *The Revenge of the Monsters of Education Technology* Audrey Watters, 2015-11-08 A collection of keynotes from 2015 *Technologies in Biomedical and Life Sciences Education* Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come **Education and Technology** Neil Selwyn, 2021-11-18 What does the future hold for digital technology and education What can be learnt from the history of technology use in education Does digital technology make education more individualized Will it eventually replace the school university and teacher In a thoroughly revised edition of this successful book Neil Selwyn takes a critical look at some of the major current debates and controversies concerning digital technologies and education Focusing on the social as well as the technical aspects of these issues Selwyn addresses fundamental but often unvoiced questions about education and technology Over the course of eight chapters the book gives careful thought to the people practices processes and structures behind the rapidly increasing use of technologies in education with an emphasis on the implications of digital technologies for individuals and institutions Brand new chapters on trends in AI and big data driven automation of education and the future s of education and technology are included This edition also features new sections exploring post digital perspectives personalized learning digital labour and the impending need for sustainable forms of digital education The book focuses attention on the connections between recent technology developments and broader changes in education practice education policy and education theory over the past few decades It also challenges us to reflect on future directions and controversies for education in the post digital age Expanded

The Public and Their Platforms Mark Carrigan, Lambros Fatsis, 2021-06-09 Available Open Access digitally under CC BY NC ND licence As social media is increasingly becoming a standard feature of sociological practice this timely book rethinks the role of these mediums in public sociology and what they can contribute to the discipline in the post COVID world It reconsiders the history and current conceptualizations of what sociology is and analyzes what kinds of social life emerge in and through the interactions between intellectuals publics and platforms of communication Cutting across multiple disciplines this pioneering work envisions a new kind of public sociology that brings together the digital and the physical to create public spaces where critical scholarship and active civic engagement can meet in a mutually reinforcing way

The Datafication of Education Juliane Jarke, Andreas Breiter, 2020-05-21 This book attends to the transformation of processes and practices in education relating to its increasing digitisation and datafication The introduction of new means to measure capture describe and represent social life in numbers has not only transformed the ways in which teaching and learning are organised but also the ways in which future generations will construct reality with and through data Contributions consider data practices that span across different countries educational fields and governance levels ranging from early childhood education to schools universities educational technology providers to educational policy making and governance The book demonstrates how digital data not only support decision making but also fundamentally change the organisation of learning and teaching and how these transformation processes can have partly ambivalent consequences such as new possibilities for participation but also the monitoring and emergence manifestation of inequalities Focusing on how data can drive decision making in education and learning this book will be of interest to those studying both educational technology and educational policy making The chapters in this book were originally published in Learning Media and Technology Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Shaping the University of the Future Stephen James Marshall, 2018-01-02 This book focuses on developing an understanding of the complex interplay of forces acting on individual universities and higher education systems to enable leaders and practitioners to take purposeful and strategic action It explores the challenging landscape of higher education and the pressures that are reshaping the university as a societal institution describing the complex interplay of technological sociological political and economic forces driving change The issues analysed are global in scope reflecting the diversity of contexts but also the common nature of the challenges facing institutions individually and collectively The analysis draws on the lessons learnt and evidence from over fifty organisational case studies undertaken by the author over the past decade exploring organisational change in higher education institutions in New Zealand Australia the United States and the United Kingdom and on his engagement as

president of the ACODE organisation with colleagues responsible for learning technological change in Australasia The book helps institutions respond to technological change purposefully in ways that build upon a clear understanding of the complex nature of the existing institution its students and the organisational context **Digitized Institutions** Jessie Daniels, Karen Gregory, Tressie McMillan Cottom, 2016-11-18 A key sociological insight is that institutions whether education the economy politics or the media shape the contours of individual life and drive inequality In this Byte the contributions take up the way that digitally mediated social processes are transforming institutions The writing here examines the interconnectedness of institutions and considers digitization across schooling work and media with an eye toward how inequality works Together these selections yield important insights into critical features of the institutions that mediate our digitized society arguing that digital sociology's greatest challenge is measuring inequalities that are produced by society's datalogical turn

Handbook of Critical Approaches to Politics and Policy of Education Kenneth J. Saltman, Nicole Nguyen, 2022-04-27 The Handbook of Critical Approaches to Politics and Policy of Education provides a broad overview of educational policy and politics from critical perspectives engaging with both foundational and cutting edge topics In critical perspectives educational policy debates and programs for reform are about more than narrow questions of efficacy say to raise test scores or for simply more educational inclusion fairer school spending or even cultural responsiveness Rather policy and reform debates represent contested visions for schools and society by social groups vying for hegemony Critical approaches to educational policy and politics see schooling and education more broadly as contested terrain in which competing visions for education are imbricated with the material and symbolic interests and cultural ideologies of different classes and cultural groups Chapters in this volume are organized into five sections The first three sections provide a foundational overview to educational policy and politics covering culture and politics of education political economy of education and subjectivity and education These chapters address longstanding and current policy and political debates as well as foundational theoretical debates The last two sections are organized around two themes that address some of the most significant recent directions of educational politics and policy disaster politics and technology *The Friendly Orange Glow* Brian Dear, 2017 Documents the story of the 1960s computer program and platform that marked the true beginning of cyberculture revealing the role of PLATO ideas in inspiring countless technological innovations from flat panel wall TVs to multiplayer games *New Laws of Robotics* Frank Pasquale, 2020-10-27 Artificial intelligence threatens to disrupt the professions as it has manufacturing Frank Pasquale argues that law and policy can avert this outcome and promote better ones instead of replacing humans technology can make our labor more valuable Through regulation we can ensure that AI promotes inclusive prosperity **Digital Sociologies** Jessie Daniels, Karen Gregory, Tressie McMillan Cottom, 2017 This handbook offers a much needed overview of the rapidly growing field of digital sociology Rooted in a critical understanding of inequality as foundational to digital sociology it connects digital media technologies to traditional areas of study in

sociology such as labor culture education race class and gender It covers a wide variety of topics including web analytics wearable technologies social media analysis and digital labor The result is a benchmark volume that places the digital squarely at the forefront of contemporary investigations of the social
