Ancient Alien Ancestors Will Hart, 2017-07-18 Explores evidence for the theory of directed panspermia that life on Earth and the landscape of Earth itself was engineered by extraterrestrials Details how the Earth was terraformed through a sophisticated geo engineering program providing clear examples such as the precise mathematical longitude configurations of the Great Pyramid of Giza with the major rivers on Earth Shows how our spectrum of blood types supports the theory of panspermia while directly contradicting the conventional out of Africa theory of evolution Examines the strongest modern UFO accounts including the Russian Roswell case as well as the suppressed UFO sightings of NASA astronauts In the early 1970s Nobel Prize winning DNA co discoverer Sir Francis Crick and his colleague Leslie Orgel proposed that in the distant past an extraterrestrial race sent a spacecraft loaded with microorganisms to seed the Earth with life Now more than 40 years later the fields of space research and biotechnology have advanced to the point where they can back up Crick and Orgel s claims about our ancient alien ancestors Sharing scientific evidence of alien involvement with life on our planet and with the very landscape of Earth itself Will Hart refines the theory of directed panspermia that life was intentionally seeded on Earth by extraterrestrials to reveal that the same ET agency also created humans and generated civilization He shows how the Earth was terraformed through an engineering program so sophisticated and vast that it has escaped our attention so far for example the major rivers on Earth are precisely aligned through geo engineering with the Great Pyramid of Giza Revealing the Great Pyramid as an alien message in stone the author explains how the Giza pyramids could not have been built by the ancient Egyptians and examines the extraterrestrial energy technologies used to move the pyramids massive stone blocks methods later

rediscovered by Nikola Tesla and the builder of Coral Castle Edward Leedskalnin He details how an advanced race implanted the basic genome on Earth as well as genetically engineered the human race and shows how our spectrum of blood types supports the theory of panspermia while directly contradicting the conventional out of Africa theory of evolution Investigating how the extraterrestrial agency behind the origin of civilization is still working behind the scenes today the author examines the strongest modern UFO accounts including the Russian Roswell case and the suppressed UFO sightings of NASA astronauts He shows that this advanced ET civilization is not an alien race in the way we normally think of aliens they are our ancestors and as human as we are

The Lure of the Edge Brenda Denzler, 2001-11-07 UFO phenomena entered American consciousness at the beginning of the Cold War when reports from astonished witnesses of encounters with unknown aerial objects captured the attention of the United States military and the imagination of the press and the public But when UFOs appeared not to be hostile and when some scientists pronounced the sightings to be of natural meteorological phenomena misidentified due to Cold War jitters military interest declined sharply and with it further overt scientific interest Yet sighting reports didn't stop and UFOs entered the public imagination as a cultural myth of the twentieth century Brenda Denzler's comprehensive clearly written and compelling narrative provides the first sustained overview and valuation of the UFO alien abduction movement as a social phenomenon positioned between scientific and religious perspectives Demonstrating the unique place ufology occupies in the twentieth century nexus between science and religion Denzler surveys the sociological contours of its community assesses its persistent attempt to achieve scientific legitimacy and concludes with an examination of the movement's metaphysical or spiritual outlook Her book is a substantial contribution to our understanding of American popular culture and the boundaries of American religion and to the debate about the nature of science and religion Denzler presents a thorough and fascinating history of the UFO abduction movement and traces the tensions between those who are deeply ambivalent about abduction narratives that seemingly erode their quest for scientific credibility and the growing cultural power of those who claim to have been abducted She locates the phenomenon within the context of American religious history and using data gathered in surveys sheds new light on the social profile of these UFO communities The Lure of the Edge succeeds brilliantly in repositioning a cultural phenomenon considered by many to be bizarre and marginal into a central debate about the nature of science technology and the production of a modern myth
