Pant Perfection

Since Adam and Eve first partook of that forbidden fruit, humans have spent immense resources to develop the perfect accoutrement for all seasons and occasions. While trends continue to evolve with various cultural and economic shifts, pants (also known as slacks) remain the most steadfast form of clothing, holding greater utility and value than all other forms of bottoms.

Pants are more sustainable than other bottoms, in terms of both manufacturing and daily usage. Ostensibly, the best clothes are the clothes a person chooses to wear frequently, without thought or second guess. In the annual Pants Symposium of 2022, Dr. Jeremy Trousers of Slack University notably said, "Pants have a psychology behind them. Pants can be worn at any time of year and are thus more likely to be worn than to stay stuck in a pile in the closet or at the bottom of a landfill."

Many people state that pants are naturally built for discomfort. However, this argument is specious at best. A survey of the student campus found that pants were not more or less comfortable than any other item of clothing. This suggests that pants are not as uncomfortable as often stated by the larger population, while also bringing to light the naturally subjective concept of "discomfort."

Pants are the best bottom covering and one of the best forms of clothing among all basic metrics. Questions about labor practices and materials used in manufacturing are worth addressing, but these apply to larger clothing industry standards. Further consideration of the clothing industry's impact on ecology and human labor is worthy and may prove to only support pants supremacy.
