Current Issues in Reading, Writing and Visual Literacy Helene Christina Demirci, Christina Gitsaki, Melanie Taylor Gobert, 2015-10-28 This volume brings together a collection of papers presented at the 2014 World Congress of the International Association of Applied Linguistics (AILA) held in Brisbane, Australia, and represents current research and practice from across the globe related to reading, writing and visual literacy. Given that globalisation has resulted in an increase in the pursuit of second language, often English, literacy for those who want to enhance their access to better education and employment options, the development of literacy skills cannot be left to chance. This book explores current efforts to tease out the variables involved in the development of literacies and will inform educators and teacher trainers of ways to improve classroom pedagogies and increase learner literacy competencies. The volume will be of use to both new and seasoned researchers wishing to enhance their understanding of current and emerging perspectives in the development of literacies. It will also be of interest to language teachers and language policy makers as the papers address current issues in language education.
