

## 20. Essay Writing

Essay is a written composition that presents the writer's opinion, gives information on any subject, or details of a narrative or a description. It consists of many paragraphs and gives details related to the topic. Essays can be of the following types :

### Analytical Essay

It analyses the topic by exploring various aspects and examining the relationship between all these aspects.

#### Techniques of writing an analytical essay :

1. Introduce the main idea in the introduction.
2. Expand the idea by adding information and including examples in the successive paragraphs.
3. Discussion can centre around various aspects of the main idea, their importance and how they are related to each other.
4. A suitable conclusion has to be given to complete the essay.

### STUDENT LIFE

A student's life is considered to be the happiest part of an individual's life. During this period, an individual spends a carefree time which is not affected by the worries and miseries of the world.

It is the time when one prepares for his future, therefore it is of great importance. Whatever he does during this span of time ultimately impacts his entire life.

Students must make sure that they don't waste time and instead utilise it by cultivating healthy habits like reading books, playing sports or by participating in creative activities like music, dance and art. This period acts as a base during which an individual can give shape to the future course of his life. For example, if someone wants to be a doctor he should gather knowledge either from his family members, teachers or perhaps real doctors regarding the skills required to be a doctor. This would give him an idea about what it takes to be a doctor and whether he has those qualities in him or not. For instance, if someone has a weak heart and cannot stand the sight of blood, will it be possible for him to study medical science? Hence, such research should be conducted during the course of a student's life.

In the modern age where everything from eatables to information is available to us at the click of a mouse, or is just a phone call away, there is always a tendency to be lethargic and lazy. We tend to be happy about the present and do not prepare ourselves for the future struggle. Students might think that, just like everything else, whatever they want in life would be easily available. As a result, many cannot handle the pressure when they face real-life situations. For this, parents can help children and make them realise that everything is not easily available and one has to struggle to achieve certain things in life.

Today there are many temptations that can divert a student from his goal. However, proper discipline can ensure that one does not lose his way.
