A forecast on the development of the 3D TV market in the US: Will 3D TVs become the next big thing in our living rooms? Anita Theis, 2013-06-01 This in depth research study discusses whether 3D TV will become a new trend in the consumers living rooms or if it is just a hype that will fail to establish itself The study contains both extensive market research as well as target group research among the American population Both parts of the study deal with the market situation of 3D TVs within the United States in 2011 and an extensive analysis of both studies provides in depth insight into a potential future of the 3D TV market in the coming years In 2010 only 3% of US households had purchased a 3D TV According to E Rogers book Diffusion of Innovation whose theory is used as a guideline throughout the whole research paper those 3% can be identified as belonging to the category of innovators To incorporate other categories of the adopter categorization the 3D TV technology has to face economic sociological and technological challenges Those challenges as well as the trends and developments influence the adoption of the technology E Rogers discusses these influencing characteristics in his work and groups them into five categories relative advantage compatibility complexity observability and trialability Based on Rogers book this study determines in how far those characteristics favor or disfavor the adoption process of 3D TV and how current trends and developments within the 3D TV sector might improve this process These conclusions are then used in a target group research in order to determine whether they are feasible and will lead to a higher adoption rate of the technology within the next 3 to 5 years Consequently this research paper can act as a guide for both TV manufacturers and TV content producers that invest or plan to invest into 3D TV However the main purpose of the study is to be the starting point for marketing managers of those companies that already have started investing in 3D technology The research gives insight into how the adoption process can be improved and it can therefore be used as a foundation for a successful marketing plan

Visualisation Antoni Moore, Igor Drecki, 2012-10-02. This book is a selection of chapters evolved from papers on completed research submitted to GeoCart 2010, the 1st ICA Regional Symposium on Cartography for Australasia and Oceania held in Auckland, New Zealand, 1st-3rd September 2010. All of the chapters have been updated and revised thoroughly. They have been blind peer-reviewed by two referees of international research standing in geospatial science, mostly in the subdisciplines of cartography and geovisualisation. The book features cutting-edge topics such as geovisual analytics, mobile Web 2.0 mapping, spatiotemporal representation, cognitive cartography, historical mapping, and 3D technology. **Maximum PC**, 1998-11

Maximum PC is the magazine that every computer fanatic, PC gamer, or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories, and the illuminating technical articles that enthusiasts crave. **Broadcasting & Cable**, 2009 **Hardware Design for 3D Video Coding** Vladimir Afonso, Murilo

Perleberg, Bruno Zatt, Marcelo Porto, Luciano Agostini, Altamiro Susin, 2025-02-19. This book focuses on the research and development challenges posed by 3D video systems based on multi-view plus depth (MVD) technology. This technology can produce a realistic immersive experience generating synthetic video views on the decoder side, reducing the amount of information on the encoder side. The discussion presented in this book explores the MVD characteristics to propose high throughput and energy-efficient architectures, focusing on 3D HEVC, the state-of-the-art standard for exploiting the MVD concept. The book includes an extensive discussion of the 3D HEVC video encoding, followed by an in-depth evaluation of the 3D HEVC reference software behavior. Then, the book presents in detail a set of high throughput and energy-efficient architectures targeting the three main prediction steps inside the 3D HEVC: intra-frame prediction, inter-frame prediction, and inter-view prediction. **Multimedia and Virtual Reality Engineering** Richard Brice, 1997-10-17. This is the complete

practical introduction to virtual reality and multimedia for those wishing to build systems. It covers the foundations and engineering needed to design and construct projects incorporating video, audio, and textural elements, and including the use of the latest hardware to create an artificial world for education, information, or entertainment. Production and authoring platforms are described; computer animation and hypertext are covered, but those looking for pages of software listings and computerspeak will be disappointed. This book is about the nuts and bolts: sound and video cards, head-mounted displays, CrystalEyes glasses, other 3D glasses for entertainment, audio and video production, and realistic auditory and visual stimulation, including stereoscopy. The creation of Cyberspace and strategies to achieve a complete Cyberatmosphere are

presented Three dimensional sound generation and video techniques that have never previously been published are revealed This is the handbook for anyone working in the industry or hoping to enter it It also provides a guide for those hoping to cross fertilise the industry coming from audio video computing or engineering backgrounds A complete technical guide to MM and VR Includes a Hypertext edition of the book with added audio and graphics on CD Hardware software video and never before published 3D audio techniques covered Global ICT Industry and Market Report: 2013 Edition MIC Research Team,2016-08-01 The rigid economic conditions in 2012 stemming from the European debt crisis slow recovery of mature economies and less expected growth in the emerging markets had caused government and enterprise sectors to cut down their spending and led to low consumer confidence Improved broadband service quality and increased income per capita in emerging countries have made smart handheld devices and other consumer electronic devices the engine of growth for the ICT Industry This report profiles the development of motherboard notebook PC including netbook server tablet smartphone large medium and small LCD panels LCD TV and DSC Digital Still Camera in 2013 and examines their future trends beyond
