## Operating Your Lawn Mower

### WARNING

Read, understand, and follow all instructions and warnings on the machine and in this manual before operating.

This blade control mechanism is a safety device. Never attempt to bypass its operations.

Use extreme care when handling gasoline. Gasoline is extremely flammable and the vapors are explosive. Never fuel the machine indoors or while the engine is hot or running. Extinguish cigarettes, cigars, pipes and other sources of ignition.

## Know Your Lawn Mower

Figure 4-1

### Blade Control Handle

The blade control handle is located on the upper handle of the mower. See Figure 9. The blade control handle must be depressed in order to operate the unit. Release the blade control handle to stop the engine and blade.

### Drive Control Handle

The drive control handle is located on the upper handle. Squeeze the drive control handle against the upper handle to engage drive system. Release the control handle to disengage the drive system in order to stop, slow down, or backup.

The adjustment wheel is located in the drive control handle housing and is used to tighten or loosen the drive belt. You will need to adjust the drive control if the mower does not propel itself with the drive control engaged or if the mower's wheels hesitate with the drive control engaged. If either of these conditions occur, rotate the adjustment wheel clockwise to tighten the cable or counterclockwise to loosen the cable. Figure 4-2.

### Mulching Plug (optional)

The mulching plug is used to close the side-discharge chute opening when mulching or bagging grass. Do not remove the hinged mulching plug at any time, even when you are not mulching.

### Recoil Starter

The recoil starter is attached to the right upper handle. Stand behind the unit and pull the recoil starter rope to start the unit.

Figure 4-2

### Cutting Height Adjustment Levers

One adjustment lever is located on each wheel and is used to adjust the cutting height. All four levers have to be at the same relative position to ensure uniform cut.

### Electric Starter (If Equipped)

The ignition switch is located on the left side of the electric starter handle panel. It is necessary to charge the battery for 8 to 10 hours before initial use. Refer to the Maintenance section for more information.

### Before Starting
