The Big Book of Tiny Cars Russell Hayes, 2021-12-21 The Big Book of Tiny Cars presents entertaining profiles of automotive history's most famous and infamous microcars and subcompacts from 1901 to today Illustrated with photos and period ads **Design for Transport** Mike Tovey, 2016-04-15 The central premise of Design for Transport is that the designer's role is to approach design for transport from the point of view of the user People have a collection of wants and needs and a significant proportion of them are to do with their requirements for mobility The authors show how creative designers can take a user focused approach for a wide range of types of transport products and systems In so doing their starting point is one of creative dissatisfaction with what is currently available and their specialist capability is in imagining and developing new solutions which respond to that opportunity How this is tackled varies depending on the context and the variety of solutions produced reflects the different aspirations and needs of the people they are designing for The chapters cover user needs and transport design and the transport system transport design case studies and the case for the automobile A conclusion briefly signals what the future for transport design might be Lavishly illustrated throughout in four colour Design for Transport is an imaginative and rigorous guide to how designers can take a user centred

and socially responsible approach to tackling a range of types of transport from systems to products and from bicycles to automobiles demonstrating a rich array of solutions through case studies

A Comparative Analysis of Taxes and CO2 Emissions from Passenger Cars in the Nordic Countries Henrik Duer,Camilla Rosenhagen,Nordic Council of Ministers,2011 The report discusses how economic instruments can be used to reduce CO2 emissions from passenger cars in the Nordic countries The analysis indicate that the registration tax and the annual circulation tax can contribute to a reduction in the average CO2 emission from new cars company car schemes in the Nordic countries provide incentives for larger cars and increased driving because of subsidies and this has long term effect as a large share of new cars are registered as company cars but are used as private cars most of their lives CO2 differentiated taxes can provide incentives to consumers to purchase CO2 efficient cars targeted broader packages which besides providing tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases transparency of targets and instruments is crucial for a large diffusion of CO2 efficient cars
