Transactions on Edutainment IV Xiaopeng Zhang, 2010-08-28 E learning and digital entertainment techniques tools and systems are becoming popular and can be found in many real world educational applications in many countries. The driving force behind these technologies is the rapidly growing requirements of edutainment especially from the perspective of the users. This has led to the increasing interest of researchers in this area. The articles in this issue give a rich overview of how edutainment technologies can be creatively used for training and education purposes. The first 12 articles of this issue represent a selection of outstanding contributions from Edutainment 2010 the 5th International Conference on E learning and Games held in Changchun China in August 2010. The main purpose of this event is to facilitate the discussion presentation and information exchange on the scientific and technological developments in the emerging field of digital entertainment techniques and systems for education. These 12 papers concentrated on three aspects: e learning system and applications, game techniques for learning, and virtual reality techniques for entertainment. They are closely related to the topics of this journal.
