Foster,Sarah T. Jewell,2022-10-17 Selected as a 2025 Doody s Core Title Systematic reviews and other evidence syntheses have a vital role in summarizing the literature exploring gaps in research prioritizing new research and providing literature to support decision making and evidence based practices Librarians adapt their practices as members of the higher education and research community If they consult and teach with researchers faculty and students review methods will likely be a part of their work **Piecing Together Systematic Reviews and Other Evidence Syntheses A Guide for Librarians** aims to be the definitive text on systematic reviews for librarians information professionals and expert searchers Starting with an introduction to evidence syntheses the book follows the acronym PIECESS a framework for the 8 phases which flow through 8 processes The 8 phases are 1 Proposal of scope 2 Protocol registration 3 Preliminary findings 4 Paper completion 5 Preserve project 6 Promote to stakeholders 7 Impact compilation 8 Updating the review The 8 processes are Plan Identify Evaluate Collect Combine Explain Summarize and Share After the processes of a review project are covered guidance for developing and running a service is provided as well as teaching reviews and training for librarians The intended audience for this book is any librarian interested in consulting collaborating completing or teaching reviews It has several applications for training librarians new to reviews for those developing a new review service for those wanting to establish policies for current service and as a reference for those conducting reviews or running a service Participating in reviews is a new frontier of librarianship with expanded opportunities for new service research areas and professional activities This book is part of the effort to standardize best practices when engaging in evidence syntheses The Review of Reviews ,1893 The American Monthly Review of Reviews Albert Shaw,1905 *The London Quarterly Review* ,1923 California Law Review ,1918

A Cooperative Species Samuel Bowles,Herbert Gintis,2011-05-31 A fascinating look at the evolutionary origins of cooperation Why do humans uniquely among animals cooperate in large numbers to advance projects for the common good Contrary to the conventional wisdom in biology and economics this generous and civic minded behavior is widespread and cannot be explained simply by far sighted self interest or a desire to help close genealogical kin In *A Cooperative Species*

Samuel Bowles and Herbert Gintis pioneers in the new experimental and evolutionary science of human behavior show that the central issue is not why selfish people act generously but instead how genetic and cultural evolution has produced a species in which substantial numbers make sacrifices to uphold ethical norms and to help even total strangers The authors describe how for thousands of generations cooperation with fellow group members has been essential to survival Groups that created institutions to protect the civic minded from exploitation by the selfish flourished and prevailed in conflicts with less cooperative groups Key to this process was the evolution of social emotions such as shame and guilt and our capacity to internalize social norms so that acting ethically became a personal goal rather than simply a prudent way to avoid punishment Using experimental archaeological genetic and ethnographic data to calibrate models of the coevolution of genes and culture as well as prehistoric warfare and other forms of group competition *A Cooperative Species* provides a compelling and novel account of how humans came to be moral and cooperative
