Routledge Handbook of Landscape and Food Joshua Zeunert, Tim Waterman, 2018-02-02 Since the turn of the millennium there has been a burgeoning interest in and literature of both landscape studies and food studies Landscape describes places as relationships and processes Landscapes create people s identities and guide their actions and their preferences while at the same time are shaped by the actions and forces of people Food as currency

medium and sustenance is a fundamental part of those landscape relationships This volume brings together over fifty contributors from around the world in forty profoundly interdisciplinary chapters Chapter authors represent an astonishing range of disciplines from agronomy anthropology archaeology conservation countryside management cultural studies ecology ethics geography heritage studies landscape architecture landscape management and planning literature urban design and architecture Both food studies and landscape studies defy comprehension from the perspective of a single discipline and thus such a range is both necessary and enriching The Routledge Handbook of Landscape and Food is intended as a first port of call for scholars and researchers seeking to undertake new work at the many intersections of landscape and food Each chapter provides an authoritative overview a broad range of pertinent readings and references and seeks to identify areas where new research is needed though these may also be identified in the many fertile areas in which subjects and chapters overlap within the book

The Foie Gras Wars Mark Caro, 2009-03-10 In announcing that he had stopped serving the fattened livers of force fed ducks and geese at his world renowned restaurant influential chef Charlie Trotter heaved a grenade into a simmering food fight and the Foie Gras Wars erupted He said his morally minded menu revision was meant merely to raise consciousness but what was he thinking when he also suggested to Chicago Tribune reporter Mark Caro that a rival four star chef's liver be eaten as a little treat The reaction to Caro's subsequent front page story was explosive as Trotter's sizable hometown moved to ban the ancient delicacy known as foie gras while an international array of activists farmers chefs and politicians clashed forcefully and sometimes violently over whether fattening birds for the sake of scrumptious livers amounts to ethical agriculture or torture Take a dish with a funny

French name add ducks top it all off with celebrity chefs eating each other's livers and that's entertainment Caro writes Yet as absurd as battling over bloated waterfowl organs might seem the controversy struck a serious chord even among those who had never tasted the stuff Reporting from the front lines of this passionate dining debate Caro explores the questions we too often avoid What is an acceptable amount of suffering for an animal that winds up on our plate Is a duck that lives comfortably for twelve weeks before enduring a few weeks of periodic force feedings worse off than a supermarket broiler chicken that never sees the light of day over its six to seven weeks on earth Why is the animal rights movement picking on such a rarefied dish when so many more chickens pigs and cows are being processed on factory farms Then again how could the treatment of other animals possibly justify the practice of feeding a duck through a metal tube down its throat In his relentless yet good humored pursuit of clarity Caro takes us to the streets where activists use bullhorns spray paint Superglue and or lawsuits as their weapons the government chambers where politicians weigh the ducks interests against their own the restaurants and outlaw dining clubs where haute cuisine preparations coexist with Foie lipops and the U S and French farms whose operators maintain that they are honoring tradition not abusing animals Can foie gras survive after 5 000 years Are we on the verge of a more enlightened era of eating Can both answers be yes Our appetites hang in the balance
