Introduction

Terrorism has grown into a pertinent global factor that has an effect on many countries and states in the world. There are several forms of terrorism, yet each of them focuses on one central issue. To begin with, the definition of terrorism is the act of employing force and violence to force others to make desired decisions and actions. In majority of the cases, there are political and ideological connections behind any act of terrorism. Yet, the main philosophy instigated by terrorism is to create and instill fear amongst the target group. People who practice terrorism use tactics that create fear to instill fear in individuals hence those who practice terrorism try to influence decisions that will help them achieve their objectives by creating fear among people and they do this mostly because of political and religious motivation.

Terrorism cases in the current world have been on the rise due to technological advancements and globalization. Such aspects have led to the redefinition of terrorism, and made slight changes to the conventional understanding. This paper assesses some literature on terrorism with the objective of highlighting different emerging issues about terrorism today. The paper will offer an analysis of diverse issues that affect the overall comprehension of terrorism, in addition to evaluating the policies undertaken by various countries in trying to combat terror in the world. Part of the major discussion in this paper will center on reorganization of terrorist groups, lone terrorism and counter terrorism efforts.
