Jadrnicek, Stephanie Jadrnicek, 2016 The Bio Integrated Farm is a twenty first century manual for managing nature's
resources This groundbreaking book brings system farming and permaculture to a whole new level Author Shawn Jadrnicek
presents new insights into permaculture moving beyond the philosophical foundation to practical advanced designs based on
a functional analysis Holding his designs to a higher standard Jadrnicek's components serve at least seven functions classical
permaculture theory only seeks at least two functions With every additional function a component performs the design
becomes more advanced and saves more energy A bio integrated greenhouse for example doesn't just extend the season for
growing vegetables it also serves as a rainwater collector a pond site an aquaponics system and a heat generator Jadrnicek's
prevalent theme is using water to do the work Although applicable in many climates his designs are particularly important
for areas coping with water scarcity Jadrnicek focuses on his experience as farm manager at the Clemson University Student
Organic Farm and at his residence in the foothills of the Blue Ridge Mountains These locations lie at the cooler northern
edge of a humid subtropical climate that extends west to the middle of Texas and north along the coast to New Jersey He has
created permaculture patterns ranging from raising transplants and field design to freshwater prawn production and
composting These patterns have simplified the operation of the 125 share CSA farm while reducing reliance on outside
resources In less time than it takes to mow his two acre homestead Jadrnicek is building a you pick fruit farm using
permaculture patterns His landscape requires only the labor of harvesting and the only outside input he buys is a small
amount of chicken feed By carefully engaging the free forces of nature water wind sunlight convection gravity and
decomposition Jadrnicek creates sustenance without maintenance and transforms waste into valuable farm resources The Bio
Integrated Farm offers in depth information about designing and building a wide range of bio integrated projects including
reflecting ponds water storage ponds multipurpose basins greenhouses compost heat extraction pastured chicken systems
