Human-Centred Technology Management for a Sustainable Future Ricardo Zimmermann, José Coelho

Rodrigues, Ana Simoes, Gustavo Dalmarco, 2025-02-18 This proceedings volume contains selected papers from the 33rd International Association for Management of Technology IAMOT Conference held from July 8-11, 2024 in Porto, Portugal. It is the second volume of a three-volume set of conference proceedings focused on technologies for a sustainable future. The book explores the challenges and opportunities in today's social and business landscapes delving into innovative and disruptive concepts. With a special emphasis on the role of technologies, it sheds light on how they enable novel approaches to address current issues. The volume demonstrates that following the principles of Industry 5.0, technologies can go far beyond productivity and economic gains, contributing to the benefit and comfort of human workers. It also elucidates the necessity of adopting a human-centered approach in utilizing technology to adapt production processes to workers' needs while ensuring that the implementation of new technologies does not infringe upon the fundamental rights of workers. **Günther Anders'**

Philosophy of Technology Babette Babich, 2021-10-21 Gunther Anders' *Philosophy of Technology* is the first comprehensive exploration of the ground-breaking work of German thinker Gunther Anders. Anders' philosophy has become increasingly prescient in our digitised technological age, as his work predicts the prevalence of social media, ubiquitous surveillance, and the turn to big data. Anders' oeuvre also explored the technologies of nuclear power and the biotech concerns for the human and transhuman condition, which have become so central to current theory. Babette Babich argues that Anders offers important resources on streaming digital media through his writings on radio, television, and film, and is unusually both a comprehensive and profound thinker. Anders' relationship with key philosophers like Hannah Arendt and Walter Benjamin, and his thinking on Goethe, Nietzsche, and Rilke, is also explored, with a focus on the deep impact he made on his peers. It reflects specifically on the intersection of Anders' thought, Heidegger, and the Frankfurt school, and how influential a figure he was on the landscape of 20th-century philosophy. A compelling rehabilitation of a thinker with profound contemporary relevance.

Science and Civilisation in China Joseph Needham, Wang Ling, Gwei-Djen Lu, 1971 Assessing EFL Writing in the

21st Century Arab World Abdelhamid Ahmed, Hassan Abouabdelkader, 2018-02-02 This book empirically explores assessment of EFL/English as a Foreign Language writing in different Arab world contexts at the university level, which often presents a challenge for teachers and students alike. Analysing a number of different practices throughout the chapters, including peer assessment, self-assessment, rubrics, and writing coherence, the authors highlight different issues and challenges that affect the assessment of EFL writing in the Arab world and provide valuable insights into how it can be improved. This book is sure to become an important practical resource for practitioners, researchers, professors, and graduate students working on EFL writing in this region. *Science and Civilisation in China, Part 7, Military Technology: The Gunpowder Epic* Joseph Needham, 1987-01-22 The Gunpowder Epic is one of three planned publications on military technology within Dr Needham's immense undertaking. The discovery of gunpowder in China by the 9th century AD was followed by its rapid applications. It is

now clear that the whole development from bombs and grenades to the invention of the metal barrel hand gun took place in the Chinese culture area before Europeans had any knowledge of the mixture itself Uses in civil engineering and mechanical engineering were equally important before the knowledge of gunpowder spread to Europe in the thirteenth and fourteenth centuries Dr Needham's new work continues to demonstrate the major importance of Chinese science and technology to world history and maintains the tradition of one of the great scholarly works of the twentieth century Library of Congress Catalogs Library of Congress,1980 Biology and Biological Technology ,1986 *Science and Civilisation in China: Volume 6, Biology and Biological Technology, Part 3, Agro-Industries and Forestry* Joseph Needham,Christian Daniels,Nicholas K. Menzies,1996-06-20 Contains two separate works The first by Christian Daniels is a comprehensive history of Chinese sugar cane technology from ancient times to the early twentieth century Dr Daniels includes an account of the contribution of Chinese techniques and machinery to the development of world sugar technology in the pre modern period devoting special attention to the transfer of this technology to the countries of South East and East Asia in the period after the sixteenth century The second by Nicholas K Menzies is a history of forestry in China A final section compares China's history of deforestation with the cases of Europe and Japan **Subject Catalog, 1978** Library of Congress,1978

Across Intellectual Property Graeme W. Austin,Andrew F. Christie,Andrew T. Kenyon,Megan Richardson,2020-03-12 Using as a starting point the work of internationally renowned Australian scholar Sam Ricketson whose contributions to intellectual property IP law and practice have been extensive and richly diverse this volume examines topical and fundamental issues from across IP law With authors from the US UK Europe Asia Australia and New Zealand the book is structured in four parts which move across IP regimes jurisdictions disciplines and professions addressing issues that include what exactly is protected by IP regimes regime differences overlaps and transplants copyright authorship and artificial intelligence internationalization of IP through public and private international law IP intersections with historical and empirical research human rights privacy personality and cultural identity IP scholars and universities and the influence of treatises and textbooks This work should be read by anyone interested in understanding the central issues in the evolving field of IP law *A Prehistory of the Cloud* Tung-Hui Hu,2015-08-21 The militarized legacy of the digital cloud how the cloud grew out of older network technologies and politics We may imagine the digital cloud as placeless mute ethereal and unmediated Yet the reality of the cloud is embodied in thousands of massive data centers any one of which can use as much electricity as a midsized town Even all these data centers are only one small part of the cloud Behind that cloud shaped icon on our screens is a whole universe of technologies and cultural norms all working to keep us from noticing their existence In this book Tung Hui Hu examines the gap between the real and the virtual in our understanding of the cloud Hu shows that the cloud grew out of such older networks as railroad tracks sewer lines and television circuits He describes key moments in the prehistory of the cloud from the game Spacewar as exemplar of time sharing computers to Cold War bunkers that were

later reused as data centers Countering the popular perception of a new cloudlike political power that is dispersed and immaterial Hu argues that the cloud grafts digital technologies onto older ways of exerting power over a population But because we invest the cloud with cultural fantasies about security and participation we fail to recognize its militarized origins and ideology Moving between the materiality of the technology itself and its cultural rhetoric Hu's account offers a set of new tools for rethinking the contemporary digital environment

Resources in Education, 1995 *Security, Risk and the Biometric State* Benjamin Muller, 2010-02-25 This book examines a series of questions associated with the increasing application and implications of biometrics in contemporary everyday life In the wake of the events of 9 11 the reliance on increasingly sophisticated and invasive technologies across a burgeoning field of applications has accelerated giving rise to the term biometric state This book explores how these virtual borders are created and the effect they have upon the politics of citizenship and immigration especially how they contribute to the treatment of citizens as suspects Finally and most importantly this text argues that the rationale of governing through risk facilitates pre-emptory logics a negligent attitude towards false positives and an overall proliferation of borders and ubiquitous risk which becomes integral to contemporary everyday life far beyond the confined politics of national borders and frontiers By focusing on specific sites such as virtual borders in airports trusted traveller programs like the NEXUS program and those delivered by airlines and supported by governmental authorities TSA and CATSA respectively this book raises critical questions about the emerging biometric state and its commitment and constitution vis-à-vis technology of governing through risk This book will be of interest to students of biopolitics critical security surveillance studies and International Relations in general Benjamin J Muller is assistant professor in International Relations at Simon Fraser University Burnaby Canada He completed his PhD in the School of Politics and International Studies at Queen's University Belfast Northern Ireland in 2005

Utility, Publicity, and Law Gerald J. Postema, 2019-07-29 The essays in this volume offer a reassessment of Jeremy Bentham's strikingly original legal philosophy Early on Bentham discovered his genius for legislation legislation included not only lawmaking and code writing but also political and social institution building and engineering of public spaces for effective control of the exercise of political power In his general philosophical work Bentham sought to articulate a public philosophy to guide and direct all of his legislative efforts Part I explores the philosophical foundations of his public philosophy his theory of meaning and framework for analysis and definition of key concepts his theory of human affections and motivations and his utilitarian theory of value It is argued that while concepts of pleasure and happiness play nominal roles in his theory of value concepts of publicity equality and interests emerge as the dominant concepts of his public philosophy Part II explores several dimensions of Bentham's jurisprudence including his radically revised command model of law his early reflections on justice and law in adjudication his theories of judicial evidence constitutional rights the rule of law and international law The concluding essay demonstrates the centrality of the notion of publicity in his moral legal and political thought Emerging from

this study is a positivist legal theory and a utilitarian moral political philosophy that challenge in fundamental ways contemporary understandings of those doctrines

Multimodal Transport Security Joseph S. Szyliowicz, Luca Zamparini, Genserik L.L. Reniers, Dawna L. Rhoades, 2016-01-29 Rapid globalisation has led to the realization that the traditional modal approach to transporting people and goods is insufficient Multimodal Transport Security illustrates the inevitable shift towards multimodal transportation systems further enabled by modern technological innovations and succinctly assesses the demanding and new security challenges that have accompanied this The emergence of these complex transportation infrastructures has created exceedingly attractive terrorist targets owing to the potential for wide scale disruption of global supply chains Providing a conjoint analysis of key issues in both passenger and freight multimodal transportation security expert contributors provide pivotal case studies highlighting the successes and failures of various policies and practices across several geographical regions Adeptly drawing these strands together the editors identify similarities and heterogeneities and in doing so produce a practical illustration of the potential for further enhancement of multimodal security An ever increasing and worldwide concern with the improvement of security in transport places this unique and comprehensive text at the forefront of transportation literature It will be of great value to students and scholars of public policy as well as policy makers in the fields of transportation and counter terrorism
