Tshwane University Of Technology 2016 Application:

Polymer Nanocomposites for Advanced Engineering and Military Applications Ramdani, Nouredine, 2019-04-01 The field of polymer nanocomposites has become essential for engineering and military industries over the last few decades as it applies to computing sensors biomedical microelectronics hard coating and many other domains Due to their outstanding mechanical and thermal features polymer nanocomposite materials have recently been developed and now have a wide range of applications Polymer Nanocomposites for Advanced Engineering and Military Applications provides emerging research on recent advances in the fabrication methods properties and applications of various nano fillers including surface modification methods and chemical functionalization Featuring coverage on a broad range of topics such as barrier properties biomedical microelectronics and matrix processing this book is ideally designed for engineers industrialists chemists government officials military professionals practitioners academicians researchers and students

Design and Applications of Nanostructured Polymer Blends and Nanocomposite Systems Sabu Thomas, Robert Shanks, Sarath Chandran, 2015-09-22 Design and Applications of Nanostructured Polymer Blend and Nanocomposite Systems offers readers an intelligent thorough introduction to the design and applications of this new generation of designer polymers with customized properties The book assembles and covers in a unified way the state of the art developments of this less explored type of material With a focus on nanostructured polymer blends the book discusses the science of nanostructure formation and the potential performance benefits of nanostructured polymer blends and composites for applications across many sectors electronics coatings adhesives energy photovoltaics aerospace automotive and medical devices biocompatible polymers The book also describes the design morphology and structure of nanostructured polymer composites and blends to achieve specific properties Covers all important information for designing and selecting the right nanostructured polymer system Provides specialized knowledge on self repairing nanofibre and nanostructured multiphase materials as well as evaluation and testing of nanostructured polymer systems Serves as a reference guide for development of new products in industries ranging from electronics coatings and energy to transport and medical applications Describes the design morphology and structure of nanostructured polymer composites and blends to achieve specific properties

Fungal Cell Factories for Sustainable Nanomaterials Productions and Agricultural Applications Kamel A Abd-El Salam, 2022-10-26 Fungal Cell Factories for Sustainable Nanomaterials Productions and Agricultural Applications explores the mycogenic synthesis of many metal nanoparticles including processing processes environmental protection and future perspectives Nanomaterials including silver gold palladium copper zinc selenium titanium dioxide metal sulphide cellulose have been formed by major fungal genes such as mushrooms Fusarium Trichoderma endophytic fungi and yeast in addition to lichens Understanding the exact process involved in the synthesis of nanoparticles and the effects of various factors on the reduction of metal ions can help to improve low cost strategies for the synthesis and extraction of nanoparticles Other sections focus on a new

framework for the production of nano antimicrobial the use of myconanoparticles against plant diseases post harvest antibiotics mycotoxin control and plant pests in addition to certain animal pathogens Myconanomaterials are well developed with great potential and promise for advanced diagnostics biosensors precision farming and targeted smart delivery systems Assesses the impact of a variety of copper based nanostructures on agri food sectors addressing the most relevant knowledge gaps Explores the opportunities that myconanotechnology can provide for industrial applications Explains the major challenges of applying myconanotechnology at an industrial scale

Polymers and Two-Dimensional Nanocomposites Rotimi Sadiku,Yskandar Hamam,Suprakas Sinha Ray,Oladiipo Folorunso,2024-11-23 *Polymers and Two Dimensional Nanocomposites* provides a detailed review of recent progress in this important research field The chapters cover new developments in synthesis methods fabrication techniques sample preparation methods surface modification characterization methods of enhancing the properties of these materials and industrial applications in energy environmental oil and gas sensors corrosion biomedical and structural applications The book provides a valuable reference resource for academic and industrial researchers materials scientists and engineers working in the fields of polymer science and engineering polymer composites and nanocomposites Covers recent developments in synthesis characterization properties and applications Discusses new fabrication techniques and how to select the right processing conditions Systematic presentation of theoretical and experimental investigation of properties for various industrial applications Attention is given to current challenges and future improvements

Feeling lives: An intersectional exploration of past experiences and present living Lindsay Clowes,LJ Theo,Nadia Sanger,Landa Mabenge,Sisa Ngabaza,2023-11-15 We each make sense of the world through our embodied feeling lives We do it through the social groupings contexts and processes which history rather than biology presents and assigns to us In this collection we aim to illustrate how these embodied feelings and emotions underpin contemporary theorising by sharing reflective autobiographical writing by individuals from a wide range of backgrounds and contexts This somewhat unruly collection unsettles conventional academic writing precisely because authors have grounded themselves in the tangible and the personal rather than in abstract theory We hope that readers might see aspects of their own lives in some of these stories develop better understandings of lives that are experienced very differently and start or continue to theorise their own lives

Advanced Composites in Aerospace Engineering Applications Norkhairunnisa Mazlan,S.M. Sapuan,R.A. Ilyas,2022-02-21 This book presents an authoritative account of the potential of advanced composites such as composites biocomposites composites geopolymer hybrid composites and hybrid biocomposites in aerospace application It documents how in recent years composite materials have grown in strength stature and significance to become a key material of enhanced scientific interest and resultant research into understanding their behavior for

selection and safe use in a wide spectrum of technology related applications This collection highlights how their unique combination of superior properties such as low density high strength high elastic modulus high hardness high temperature capability and excellent chemical and environmental stability are optimized in technologies within these field

Encyclopedia of Polymer Applications, 3 Volume Set Munmaya Mishra,2018-12-17 Undoubtedly the applications of polymers are rapidly evolving Technology is continually changing and quickly advancing as polymers are needed to solve a variety of day to day challenges leading to improvements in quality of life The Encyclopedia of Polymer Applications presents state of the art research and development on the applications of polymers This groundbreaking work provides important overviews to help stimulate further advancements in all areas of polymers This comprehensive multi volume reference includes articles contributed from a diverse and global team of renowned researchers It offers a broad based perspective on a multitude of topics in a variety of applications as well as detailed research information figures tables illustrations and references The encyclopedia provides introductions classifications properties selection types technologies shelf life recycling testing and applications for each of the entries where applicable It features critical content for both novices and experts including engineers scientists polymer scientists materials scientists biomedical engineers macromolecular chemists researchers and students as well as interested readers in academia industry and research institutions
