Shipments of flat knitting machines rose by 52 per cent while deliveries of shuttle less looms increased by 14 per cent year on year in 2015 according to the 38th annual International Textile Machinery Shipment Statistics (ITMSS) released by the International Textile Manufacturers Federation (ITMF). On the other hand, shipments in some textile machinery segments experienced declines in 2015. Deliveries of new short staple spindles fell by nearly 8 per cent from 2014 to 2015. Shipped long staple spindles and open end rotors decreased by 61 per cent and 6 per cent respectively. The number of shipped draw texturing spindles fell by 26 per cent and shipments for new circular knitting machines by 6 per cent year on year. However, 2015 was a very good year for the segment of electronic flat knitting machines as global shipments grew by 52 per cent to 70,100 machines, the highest level since 2011. Not surprisingly, Asia received the highest share of shipments, 93 per cent. China remained the world's largest investor for flat knitting machines in 2015. Thereby, Chinese investments increased from 19,000 units to 35,500 units. But due to rising labour and production costs, textile and garment manufacturing is shifting to a certain extent from China. As a result, new plants are being set up in other countries, especially in Asia and Africa. This is where the new machineries would be in demand.
