Phone Cases In a world where smart phones are treated like an extra limb it shouldn't be surprising that they and the cases that protect them are covered in germs especially considering the heat that they generate which creates an ideal environment for harmful microbes Luckily there's an easy fix Fill a water bottle with distilled water and 70% Isopropyl Alcohol Squirt this elixir onto a microfiber pad and you have yourself a germ fighting juice fit for a king

Doorknobs Public restrooms have made great strides in eliminating germs from their spaces but one thing they haven't tackled is doorknobs that little round thing everyone who uses the bathroom uses on their way out While some places have adopted high tech measures to combat this issue like plastic covered doorknobs that automatically filter out after every use there are other simpler solutions like installing copper or brass doorknobs which naturally cut out germs over time

Dollar Bills and Coins When you hear the phrase dirty money your mind may immediately jump to drug deals or an assassin's salary but maybe you should take a more literal approach to this phrase Why Because studies show that fibrous U S dollars may be one of the dirtiest objects in the world Their lengthy circulation multiplied by the number of people each bill comes in contact with single bills see more activity than larger ones creates a recipe for disaster Thankfully the cure for this issue has already been introduced albeit for other reasons with the nation's move towards automation comes a growing preference for cash free lifestyles that favor credit cards and digital money apps over physical bills
