implementation of management on local and global scales Chapter 17 describes different future scenarios depending on current trends in plant invasion and its management just as climate change predictions employ various scenarios to project the future The future is very much up to us as humanity grapples with the question of how best to strategically meet the problems of global invasive plant problems that we ourselves have created that is further challenged by a changing climate We are confident that this book will be of interest to invasion biologists resource managers and the legion of others who must deal with these invasive plants across the globe on a daily basis
