Landing Obligation Sven Sebastian Uhlmann, Clara Ulrich, Steven J. Kennelly, 2018-12-19 This open access book provides a comprehensive examination of the European Landing Obligation policy from many relevant perspectives It includes evaluations of its impacts at economical socio cultural ecological and institutional levels It also discusses the feasibility and benefits of several potential mitigation strategies The book was timely published exactly at the time where the Landing Obligation was planned to be fully implemented This book is of significant interest to all stakeholders involved but also to the general public of Europe and to other jurisdictions throughout the world that are also searching for ways to deal with by catch and discard issues **Movement as Conflict Transformation** Susan Forde, 2018-07-21 This book presents narratives of the social use of space in the divided city of Mostar Bosnia Herzegovina Through the narratives of movement in the city the work demonstrates how residents engage informally with conflict transformation through new movement and use of spaces This book will appeal across the social sciences and in particular to students academics and researchers in the fields of peace and conflict studies political sociology and human geography **Challenging the Representation of Ethnically Divided Cities** Giulia Carabelli, Aleksandra Djurasovic, Renata Summa, 2021-05-25 The book Challenging the Representation of Ethnically Divided Cities Perspectives from Mostar questions the existing overrepresentation of Mostar as an ethnically divided city While acknowledging the existence of internal borders the chapters in this book assert that they are not solid nor fixed and by exploring how they become material or immaterial the book offers a deeper understanding of the city s complex dynamics Accordingly the chapters in this book are attentive to how ethnic divides materialise or lose importance because of

socio political contingencies Events groups and spaces that promote reconciliation from the bottom up are examined not necessarily to assess their success and failures but rather to look at how they create networks gain trust and form platforms that generate novel understandings of ethnic loyalties and party memberships Further and drawing both on the empirical data and theoretical reflections this volume contributes to broader debates about divided cities by suggesting the need to engage with these cities in their complexities rather than reducing them to their ethno national divisions The book engages with socio political and economic complexities in order to shed light on how ethnic conflicts and resulting spatial partitioning are often just the surface of much more complex dynamics that are far less easy to disentangle and represent The chapters in this book were originally published in Space and Polity

Integrated Pollution Prevention and Control for the Municipal Water Cycle in a River Basin Context Alberto Galvis-Castaño, 2019-08-14 The protection of water resources from deterioration in quality by pollution discharges is probably the biggest challenge in sustainable water resources management in the recent decades In practice most countries have adopted pollution control strategies and measures which are based on end of pipe solutions wastewater treatment plants and adjustments to the regulations including taxes for wastewater discharges Conventional Strategy Although this approach involves very high costs on many occasions this strategy has been a complete failure The research described in this book contribute to the development of sustainable solutions for the previously outlined problem It was based on the validation of the Three Step Strategic Approach concept 3 SSA which includes 1 prevention or minimisation of waste production 2 treatment aimed at recovery and reuse of waste components and 3 disposal of remaining waste with stimulation of natural self purification of the receiving water body The study showed overall positive effects of the 3 SSA in comparison of Conventional Strategy on wastewater management in the Upper Basin 389 km of the Cauca river the second most important river in Colombia The Cost Benefit Analysis clearly favoured the 3 SSA generating a major impact on the river water quality at lower cost compared to the Conventional Strategy
