Nanostructured Metal-Oxide Electrode Materials for Water Purification Onoyivwe Monday Ama, Suprakas Sinha Ray, 2020-04-07 This book reports on the development of nanostructured metal oxide based electrode materials for use in water purification The removal of organic pollutants and heavy metals from wastewater is a growing environmental and societal priority This book thus focuses primarily on new techniques to modify the nanostructural properties of various solvent electrolyte combinations to address these issues Water treatment is becoming more and more challenging due to the ever increasing complexity of the pollutants present requiring alternative and complementary approaches toward the removal of toxic chemicals heavy metals and micro organisms to name a few This contributed volume cuts across the fields of electrochemistry water science materials science and nanotechnology while presenting up to date experimental results on the properties and synthesis of metal oxide electrode materials as well as their application to areas such as biosensing and photochemical removal of organic wastewater pollutants Featuring an introductory chapter on electrochemical cells this book is well positioned to acquaint interdisciplinary researchers to the field while providing topical coverage of the latest techniques and methodology It is ideal for students and research professionals in water science materials science and chemical and civil engineering

System Design in Software Engineering Radek Silhavy, Petr Silhavy, 2025-07-23 This book offers a broad range of ideas from CoMeSySo 2024 highlighting theory and practice in modern computing Researchers from diverse backgrounds present their latest findings on systems design software engineering and innovative problem solving Topics include new methods to improve modeling testing and optimization across various fields The book also shows how data driven approaches and well structured architectures can increase reliability These proceedings foster meaningful teamwork and shared learning by bringing together experts from many areas Readers will gain insights into advanced techniques that can be adapted to real world situations Industry specialists academic researchers and students will benefit from the breadth of approaches Case studies reveal common hurdles and present workable solutions for upcoming challenges With a clear focus on advancement this resource is an essential guide to the next steps in computational development

Southern Resistance in Critical Perspective Marcel Paret, Carin Runciman, Luke Sinwell, 2017-03-27 From the Arab Uprising to anti austerity protests in Europe and the US Occupy Movement to uprisings in Brazil and Turkey resistance from below is flourishing Whereas analysts have tended to look North in their analysis of the recent global protest wave this volume develops a Southern perspective through a deep engagement with the case of South Africa which has experienced widespread popular resistance for more than a decade Combining critical theoretical perspectives with extensive qualitative fieldwork and rich case studies

Southern Resistance in Critical Perspective situates South Africa's contentious democracy in relation to both the economic insecurity of contemporary global capitalism and the constantly shifting political terrain of post-apartheid nationalism. The analysis integrates worker community and political party organizing into a broader narrative of resistance bridging historical divisions between social movement studies, labor studies and political sociology.

Industry 4.0 - Shaping The Future of The Digital World Paulo Jorge da Silva, Bartolo, Fernando Moreira da Silva, Shaden Jaradat, Helena Bartolo, 2020-10-28. The City of Manchester, once the birthplace of the 1st Industrial Revolution, is today a pioneering hub of the 4th Industrial Revolution, Industry 4.0, offering Industry 4.0 solutions in advanced materials, engineering, healthcare and social sciences. Indeed, the creation of some of the city's greatest academic institutions was a direct outcome of the industrial revolution, so it was something of a homecoming that the Sustainable Smart Manufacturing S2M Conference was hosted by The University of Manchester in 2019. The conference was jointly organised by The University of Manchester, The University of Lisbon and The Polytechnic of Leiria, the latter two bringing in a wealth of expertise in how Industry 4.0 manifests itself in the context of sustainably evolving, deeply rooted cities. S2M 2019 instigated the development of 61 papers selected for publication in this book on areas of Smart Manufacturing, Additive Manufacturing and Virtual Prototyping, Materials for Healthcare Applications and Circular Economy, Design, Education and Urban Spaces.

12th International Conference on Information Systems and Advanced Technologies "ICISAT 2022" Mohamed Ridda Laouar, Valentina Emilia Balas, Brahim Lejdel, Sean Eom, Mohamed Amine Boudia, 2023-02-04. The ICISAT 2022 conference provided a forum for research and developments in the field of information systems and advanced technologies and new trends in developing information systems, organizational aspects of their development and intelligent aspects of the final product. The aim of the ICISAT 2022 is to report progress and development of methodologies, technologies, planning and implementation tools and standards in information systems, technologies and sciences. ICISAT 2022 aims at addressing issues related to the intelligent information data science and decision support system from multidisciplinary perspectives and to discuss the research, teaching and professional practice in the field. The book of ICISAT 2022 includes selected papers from the 12th International Conference on Information Systems and Advanced Technologies. ICISAT 2022 organized online during August 26-27, 2022. In this book, researchers, professional software and systems engineers from around the world addressed intelligent information data science and decision support system for the conference. The ideas and practical solutions described in the book are the outcome of dedicated research by academics and practitioners aiming to advance theory and practice in this research domain. The list of topics is in all the areas of modern intelligent information systems and technologies such as neural networks, evolutionary computing, adaptive systems, pervasive system, ubiquitous system, E-learning and teaching, knowledge-based paradigms, learning paradigms, intelligent data analysis, intelligent decision making and support system, intelligent network security, web intelligence, deep learning, natural language processing, image processing, general machine learning and unsupervised learning.

Utilisation

of Research in South Africa's Research Institutes Leisl Joanne Neskakis, 2012 The overarching aim of this study is to analyse what researchers in South African higher education institutes and science councils mean by the term utilisation i.e. what do researchers mean when they indicate that their research findings are being utilised The data used to conduct this analysis is taken from a national survey conducted for the purpose of establishing the extent to which research findings in South Africa are utilised The author played an active role in this survey component of the research conducted for the South African National Advisory Committee on Innovation NACI The study also covers the specific dynamics of the utilisation process How does research utilisation occur and what are the key variables in this process In answering this question the author discusses five prominent models of knowledge utilisation that have been put forward over the past three decades The Two Communities theory of Norman Caplan 1979 The three models of policy research of Carol Weiss 1991 The Triple Helix model of Henry Etzkowitz and Loet Leydesdorff 1996 The three policy paradigms of Barry Bozeman 1994 and The Contingency Effectiveness model of Technology Transfer CETT of Barry Bozeman 2000
