Vector Calculus Instructor's Manual Jerrold E. Marsden,2003-08-29

Vector Calculus Susan Jane Colley,2002 Appropriate for sophomore level courses in Multivariable Calculus A traditional and accessible calculus text with a strong conceptual and geometric slant that assumes a background in single variable calculus The text uses the language and notation of vectors and matrices to clarify issues in multivariable calculus It is designed to provide a greater challenge than the multivariable material typically found in the last four or five chapters of a three semester calculus text This challenge is balanced by clear and expansive writing and an interesting selection of material

Vector Calculus Instructor's Manual Jerrold E. Marsden,1996-08-01 This instructor s manual accompanies the main text

Multivariable Mathematics Theodore Shifrin,2004-01-26 Multivariable Mathematics combines linear algebra and multivariable calculus in a rigorous approach The material is integrated to emphasize the role of linearity in all of calculus and the recurring theme of implicit versus explicit that persists in linear algebra and analysis In the text the author addresses all of the standard computational material found in the usual linear algebra and multivariable calculus courses and more interweaving the material as effectively as possible and also including complete proofs By emphasizing the theoretical aspects and reviewing the linear algebra material quickly the book can also be used as a text for an advanced calculus or multivariable analysis course culminating in a treatment of manifolds differential forms and the generalized Stokes s Theorem
