Remixing the Curriculum Elizabeth Stringer Keefe,Adam Steiner,2018-02-06
Remixing the Curriculum offers educators a way to rethink traditional curricular approaches through a curricular remix a concept in which a curriculum becomes different from its original form retaining its basic foundational elements but experiencing a metamorphosis to create a new version Remixing the Curriculum suggests that the way to develop curriculum to maximize student access and engagement is to employ essential elements of traditional pedagogy but infuse it with technology to create new features through the X Framework XFW XFW capitalizes on four essential features of educators practice and learning Technology Fitness in which a teacher self evaluates their comfort level using technology Proactive Teaching which front loads the planning and preparation for instruction to prior to implementation Universal Design for Learning UDL a set of principles which guide the conditions for learning including flexible learning environments to accommodate individual learning differences and Assistive Technology technology to improve the capabilities of students with disabilities At the intersection of these four quadrants is X which serves as a fulcrum for access to the curriculum

Hansmann,Lothar Merk,Martin S. Nicklous,Thomas Stober,2013-04-17 Our future is pervasive We were not meant to be chained to our computers in our Dil bert cubic1es Having millions of white collar workers commute to work every day to sit for eight hours chained to their computer is something right out of a Kafka novel Before the cell phone I can remember sitting at my desk waiting for calls to be returned If I was traveling I made sure that I was all setup to place calls from public phone booths Today I can t imagine having to look for a telephone booth I can be reached on my tri band digital cell phone anywhere in the world instantly I also have a PDA that I carry everywhere My PDA instantly synchronizes with my desktop computer which in turn connects to a larger network of computers and web portals The world is my neighborhood Soon digital devices will be working together hand in hand thanks to technologies such as Bluetooth This inc1udes devices such as Cell phones Digital Cameras PDAs and desktop computers The Wireless Internet is the catalyst for the convergence of digital communications computing and rich media This is a mega trend that we call Pervasive Computing What Pervasive Computing means to each and every one of us is the ability to take our own worlds of personal and business infor mation with us wherever we go Now we can always be in touch with our families affinity groups and co workers *Data-Intensive Science*

Terence Critchlow,Kerstin Kleese van Dam,2016-04-19 Data intensive science has the potential to transform scientific research and quickly translate scientific progress into complete solutions policies and economic success But this collaborative science is still lacking the effective access and exchange of knowledge among scientists researchers and policy makers across a range of disciplines Bringing together leaders from multiple scientific disciplines Data Intensive Science shows how a comprehensive integration of various techniques and technological advances can effectively harness the vast amount of data being generated and significantly accelerate scientific progress to address some of the world s most challenging problems In the book a diverse cross section of application computer and data scientists explores the impact of data intensive science on current research and describes emerging technologies that will enable future scientific breakthroughs The book identifies best practices used to tackle challenges facing data intensive science as well as gaps in these approaches It also focuses on the integration of data intensive science into standard research practice explaining how components in the data intensive science environment need to work together to provide the necessary infrastructure for community scale scientific collaborations Organizing the material based on a high level data intensive science workflow this book provides an understanding of the scientific problems that would benefit from collaborative research the current capabilities of data intensive science and the solutions to enable the next round of scientific advancements The Oxford

Handbook of Computational Linguistics Ruslan Mitkov,2022-06-02 Ruslan Mitkov s highly successful Oxford Handbook of

Computational Linguistics has been substantially revised and expanded in this second edition. Alongside updated accounts of the topics covered in the first edition, it includes 17 new chapters on subjects such as semantic role labelling, text-to-speech synthesis, translation technology, opinion mining and sentiment analysis, and the application of Natural Language Processing in educational and biomedical contexts among many others. The volume is divided into four parts that examine respectively the linguistic fundamentals of computational linguistics, the methods and resources used such as statistical modelling, machine learning and corpus annotation, key language processing tasks including text segmentation, anaphora resolution and speech recognition, and the major applications of Natural Language Processing from machine translation to author profiling. The book will be an essential reference for researchers and students in computational linguistics and Natural Language Processing, as well as those working in related industries.

Data Analytics-Based Demand Profiling and Advanced Demand Side Management for Flexible Operation of Sustainable Power Networks Jelena Ponoćko, 2020-01-27 This thesis deals with two important and very timely aspects of the future power system operation: assessment of demand flexibility and advanced demand side management (DSM) facilitating flexible and secure operation of the power network. It provides a clear and comprehensive literature review in these two areas and states precisely the original contributions of the research. The book first demonstrates the benefits of data mining for a reliable assessment of demand flexibility and its composition, even with very limited observability of the end users. It then illustrates the importance of accurate load modelling for efficient application of DSM and considers different criteria in designing a DSM programme to achieve several objectives of the network performance simultaneously. Finally, it demonstrates the importance of considering realistic assumptions when planning and estimating the success of DSM programs. The findings presented here have both scientific and practical significance. She gained her BSc and MSc degrees in electrical engineering from the University of Belgrade in 2011 and 2012 respectively. She graduated with her PhD from the University of Manchester. She has presented at several conferences and has won runner-up prizes in poster presentation at three. She has authored or co-authored more than 40 journal, conference and technical papers, which provide a basis for further research and can be used to guide future applications in industry.
