Open Source Software Policy Options for NASA Earth and Space Sciences National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Best Practices for a Future Open Code Policy for NASA Space Science, 2019-01-27 Modern science is ever more driven by computations and simulations. In particular, the state of the art in space and Earth science often arises from complex simulations of climate, space weather, and astronomical phenomena. At the same time, scientific work requires data processing, presentation, and analysis through broadly available proprietary and community software. 1. Implicitly or explicitly, software is central to science. Scientific discovery, understanding, validation, and interpretation are all enhanced by access to the source code of the software used by scientists. This report investigates and recommends options for NASA's Science Mission Directorate SMD as it considers how to establish a policy regarding open source software to complement its existing policy on open data. In particular, the report reviews existing data and software policies and the lessons learned from the implementation of those policies, summarizes community perspectives, and presents policy options and recommendations for implementing an open source software policy for NASA SMD.

Meta-Analysis Shahjahan Khan, 2020-10-27 This book focuses on performing hands-on meta-analysis using MetaXL, a free add-on to MS Excel. The illustrative examples are taken mainly from medical and health sciences studies, but the generic methods can be used to perform meta-analysis on data from any other discipline. The book adopts a step-by-step approach to perform meta-analyses and interpret the results. Stata codes for meta-analyses are also provided. All popularly used meta-analytic methods and models, such as the fixed effect model, random effects model, inverse variance, heterogeneity model, and quality effect model, are used to find the confidence interval for the effect size measure of independent primary studies and the pooled study. In addition to the commonly used meta-analytic methods for various effect size measures, the book includes special topics such as meta-regression, dose-response meta-analysis, and publication bias. The main attraction for readers is the book's simplicity and straightforwardness in conducting actual meta-analysis using MetaXL. Researchers would easily find everything on meta-analysis of any particular effect size in one specific chapter, once they could determine the underlying effect measure. Readers will be able to see the results under different models and also will be able to select the correct model to obtain accurate results.

Tropical Seaweed Farming Trends, Problems and Opportunities Anicia Q. Hurtado, Alan T. Critchley, Iain C. Neish, 2017-10-17 This book collates the latest information on Kappaphycus and Eucheuma seaweeds. The edited volume provides an important companion to anyone studying or working with what is the world's largest cultivated marine plant biomass. The contributing authors have excelled in providing information on production and present and future uses of these carrageenan-bearing seaweeds. Important elements of taxonomy, distribution, and methods of cultivation and processing are presented to the reader in an accessible and easily understood format. The book provides a number of valuable opinions on value addition and MUZE technologies, which

highlight value chains associated with these important red algae

Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems Mani, Nandita S.,Cawley, Michelle A.,2022-05-06 Beyond providing space for data science activities academic libraries are often overlooked in the data science landscape that is emerging at academic research institutions Although some academic libraries are collaborating in specific ways in a small subset of institutions there is much untapped potential for developing partnerships As library and information science roles continue to evolve to be more data centric and interdisciplinary and as research using a variety of data types continues to proliferate it is imperative to further explore the dynamics between libraries and the data science ecosystems in which they are a part The Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems provides a global perspective on current and future trends concerning the integration of data science in libraries It provides both a foundational base of knowledge around data science and explores numerous ways academicians can reskill their staff engage in the research enterprise contribute to curriculum development and help build a stronger ecosystem where libraries are part of data science Covering topics such as data science initiatives digital humanities and student engagement this book is an indispensable resource for librarians information professionals academic institutions researchers academic libraries and academicians
