

S'more Stoichiometry

Contributed by Carolle Henry
San Antonio, TX

Definitions: 'Stoichio' means element and 'metry' means the process of measuring. The mass and quantity relationships among reactants and products in a reaction are found using the process of stoichiometry.

Problem:

- 1) If you are given one bag of large marshmallows, what is the maximum number of S'mores that can be made?
- 2) How many boxes of graham crackers and how many chocolate bars are needed to make this many S'mores?

Solutions:

1st Step: Write a chemical equation using the following symbols:

Substance	Symbol	Unit Mass
Graham Cracker	S	7.00 g
Marshmallow	Mm	7.10 g
Chocolate Pieces	Or	3.30 g
S'more	S_2MmOr_3	_____ g

Calculate the unit mass of the S'more (S_2MmOr_3) below:

2nd Step: Balance the equation: What does the equation tell us? What do the coefficients represent?

They represent the ratio of the _____ or the _____.
