Multinationals, Global Value Chains and Governance Peter Hertenstein,2019-08-16 This book uses the examples of local supply firms in China and Brazil and their connections to the global automotive industry to explore the nature of current global value chains It argues that lead firms make use of product architecture to globalize their procurement and supply chain management and that they effectively restructure the global supply base by internationalizing the most capable supply firms thereby creating oligopolies controlled by the lead firm The book goes on to contend that some firms have gained such powerful positions that they have gained a degree of control over other firms without the necessity of ownership altering the mechanics of governance Also it shows how although some supply firms from emerging markets have utilized their business ties with western assembly firms to upgrade themselves within the global value chain most are squeezed out through increased global competition Overall the book makes a major new contribution to the economic theory of governance

Japan and the Global Automotive Industry Koichi Shimokawa,2010-06-03 The Japanese automotive industry enjoyed spectacular success in the 1980s This was largely due to the so called Lean Production System the combination of an efficient production system an effective supplier system and a product development system In the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation In this book eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms to show how the Japanese automotive industry has managed to recover from this difficult period He shows how firms like Toyota were able to transfer Japanese systems to overseas plants and how they have changed in order to compete in increasingly globalized markets In addition the book also addresses the two major challenges to the current industry model the rise of China and the environmental and energy supply situation

Europe's Automotive Industry on the Move Oliver Heneric,Georg Licht,Wolfgang Sofka,2006-03-30 The automotive industry is a major pillar of the modern global economy and one of Europe's key industries There can hardly be any doubt about the important role of this sector as an engine for employment growth and innovation in Europe and there are crucial challenges and opportunities ahead The authors shed light on a broad range of issues globalisation and restructuring trade and foreign direct investment innovation regulation and industry policy and put a special focus on the new member states While change may be inevitable progress is not This book shall serve as a map to all stakeholders business executives and policy makers investors and scholars
