Progress in Modern Hydrology John C. Rodda, Mark Robinson, 2015-07-09 Hydrology is vital to human civilisations as well as to natural ecosystems yet it has only emerged as a distinct scientific discipline during the last 50 years or so This book reviews the development of modern hydrology primarily through the experiences of the multidisciplinary team of scientists and engineers at Wallingford near Oxford who have been at the forefront of many of the developments in UK hydrological research These topics include The development of basic understanding through the collection of data with specialised instrumentation in experimental basins The study of extreme flows both floods and droughts The role moisture in the soil Studies of the processes controlling evaporation Water resource studies Modelling and prediction of the extremes of flow improved Understanding of water quality issues A widening recognition of the importance of an ecosystem approach Meeting the challenges of climate change Data handling Future developments in hydrology and the pressures which generate them Readership hydrologists in both academia and a wide range of applied fields such as civil engineering meteorology geography and physics as well as advanced students in earth science environmental science and physical geography programmes worldwide The Evolution of European Manufacturing Industries Bolesław Domański, Grzegorz Micek, Robert Guzik, Krzysztof Gwosdz, Arkadiusz Kocaj, 2024-08-29 The book provides a picture of the increasing significance of Central Europe and especially Poland in global production networks discussing the underlying economic social and political factors The key question it answers is to what extent the growth of production and exports results in industrial upgrading towards the manufacturing of more sophisticated high value added products new technologies and the development of non production functions especially design and advanced service capabilities The book shows that Central European manufacturing no longer exhibits the typical features of production activities in the periphery in particular low density and diversity low productivity narrow specialisation in low value added activities and poor local linkages hence limited local value creation and value capture There is still dependence on foreign controlled enterprises in several sectors and limited product innovation which remains a major weakness Further the book assesses the social consequences of the ongoing development of manufacturing capabilities in Poland and its impact on employment conditions including the quality of jobs and level of wages The authors provide insight into relationships between globalisation processes place specific attributes and current economic policies and as such the book will be of interest to academics policy makers and other stakeholders interested in both peripheral economies and core countries and representing various international organisations dealing with economic transition and development The Army List Great Britain. and in a Zionist summer camp and the later education that thrust him into a life changing world of ideas and far reaching literary traditions Dickstein brilliantly depicts the tension between the parochial religious world of his youth and the siren call of a larger cosmopolitan culture a rebellion that manifested itself in a yarmulka replaced by Yankees cap a Shakespeare play concealed behind a heavy tractate of the Talmud and classes cut on Wednesday afternoons to take in the Broadway theater Tracing a path from the Lower East Side to Columbia University Yale and Cambridge Dickstein leaves home travels widely and falls in love breaking through to new experiences of intimacy and sexual awakening only to be brought low by emotional conflicts that beset him as a graduate student homesickness a sense of cultural dislocation issues that come to a head during a troubled year abroad In *Why Not Say What Happened* we see Dickstein come into his own as a teacher and writer deeply engaged with poetry the daringly modern Blake the bittersweet negotiations of time and loss in Wordsworth and the shifting turns of consciousness itself in Keats While eloquently evoking the tumult of the sixties and a culture in flux *Why Not Say What Happened* is enlivened by Dickstein's Zelig like presence at nearly every significant aesthetic and political turning of the second half of the American twentieth century Cynthia Ozick Dickstein crafts memorable portraits of his own mentors and legendary teachers like Lionel Trilling Peter Gay F R Leavis and Harold Bloom who become inimitable role models They provide him with a world class understanding of how to read and nourish his burgeoning feeling for literature and history In the tradition of classic memoirs by Alfred Kazin and Irving Howe this frank and revealing story at once keenly personal and broadly cultural sheds light on the many different forms education can take
