**HCPSS Student Learning Objective
Speech Language Pathology
Visualizing and Verbalizing Comprehension**

Component	Description
Student Learning Objective (SLO)	100% of students on my caseload with language comprehension difficulties especially higher-order thinking skills will demonstrate growth towards mastery of <u>citing textual evidence to support analysis of what the text says explicitly as well as inferences drawn from text</u> (Common Core State Standards for Literature Grades: 6-12).
Population	_____ # of students in middle school who are identified through their IEPs as having documented language comprehension difficulties.
Learning Content	Skills to be addressed include understanding and using Visualizing and Verbalizing strategies and structure words to understand what is being read in a piece of text both explicitly as well as through inferencing. These skills specifically include answering "wh" questions, identifying facts, making predictions, and drawing conclusions.
Instructional Interval	2013-2014 school year
Evidence of Growth	Student growth will be measured by using a Visualizing and Verbalizing Reading Comprehension Rubric quarterly made by the SLP. Pre and post data will be gathered at the start of the school year and end of the school year.
Baseline	SLP will use a <i>Reading Comprehension Rubric</i> to determine how well a student can make predictions, draw conclusions, understand key facts, and answer "wh" questions to obtain a point value at the beginning of the school year. (Attach class roster to share students' scores on Beginning-of-the-Year Assignment/Performance Task/Assessment.)
Rationale for Student Learning Objective	The primary cause of students with language comprehension problems is weakness in concept imagery contributing to difficulties with oral language/reading comprehension, oral and written expression, and critical thinking.

This SLO is a sample. Targets need to be adjusted based on your students' data. Student growth should be achieved for all students.
