algebra is helpful but not required *Macroeconomics* Mark Rush, Robert J. Barro, 1998 prepared by Mark Rush **The Testing Charade** Daniel Koretz, 2017-08-31 For decades we've been studying, experimenting with, and wrangling over different approaches to improving public education and there's still little consensus on what works and what to do. The one thing people seem to agree on, however, is that schools need to be held accountable; we need to know whether what they're doing is actually working. But what does that mean in practice? High stakes tests. Lots of them. And that has become a major problem. Daniel Koretz, one of the nation's foremost experts on educational testing, argues in *The Testing Charade* that the whole idea of test-based accountability has failed; it has increasingly become an end in itself, harming students and corrupting the very ideals of teaching. In this powerful polemic, built on unimpeachable evidence and rooted in decades of experience with educational testing, Koretz calls out high stakes testing as a sham, a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement. Rather than setting up incentives to divert instructional time to pointless test prep, he argues, we need to measure what matters and measure it in multiple ways, not just via standardized tests. Right now, we're lying to ourselves about whether our children are learning. And the longer we accept that lie, the more damage we do. It's time to end our blind reliance on high stakes tests. With *The Testing Charade*, Daniel Koretz insists that we face the facts and change course, and he gives us a blueprint for doing better. **Prometheus Certified Associate (PCA)** QuickTechie - A career growth machine, 2025-01-19 About the Prometheus Certified Associate PCA Certification The Prometheus Certified Associate PCA certification validates an engineer's foundational knowledge of observability and monitoring principles, specifically using Prometheus. According to QuickTechie.com, it's designed as a pre-professional certification ideally suited for engineers and application developers who are passionate about observability practices. This certification confirms a candidate's understanding of how to build and scrape observability data within an application stack, whether it's cloud-native or not. The PCA exam is structured to prepare individuals to work with the core aspects of data monitoring, including metrics, alerts, and dashboards within the Prometheus ecosystem. Achieving the PCA signifies an understanding of the best practices for monitoring cloud-native applications and infrastructure utilizing Prometheus. As QuickTechie.com highlights, this digital credential demonstrates a candidate's competence in leveraging observability data to enhance application performance, troubleshoot system issues, and integrate that data with other systems. The certification's focus encompasses key domains and competencies: Observability Concepts (18%) Understanding of metrics, logs, and events; tracing and spans; push vs pull models; service discovery mechanisms; and the basics of Service Level Objectives (SLOs), Service Level Agreements (SLAs), and Service Level Indicators (SLIs). This domain covers the fundamental concepts required to understand the landscape of observability. Prometheus Fundamentals (20%) Knowledge of Prometheus's system architecture, configuration, and scraping processes; limitations, data model, and labels; and the exposition format used. This section is focused on the internal workings of Prometheus. Prometheus Query Language (PromQL) (28%) Proficiency in using the Prometheus Query Language (PromQL).

including selecting data calculating rates and derivatives aggregating data over time and dimensions applying binary operators understanding histograms and working with timestamp metrics This is a crucial component for anyone working with Prometheus Instrumentation and Exporters 16% Understanding client libraries instrumentation techniques use of exporters and structuring and naming metrics effectively This domain helps candidates understand how to make applications observable Alerting Dashboarding 18% Knowledge of dashboarding basics configuring alerting rules using Alertmanager and understanding the fundamentals of effective alerting practices when what and why This section ensures candidates can use Prometheus data for actionable insights As noted by QuickTechie com there are no prerequisites for the PCA exam making it accessible for those with a foundational understanding of IT or those aiming to enhance their observability skills The certification is not only useful for professionals but also helps to bridge the gap between those who have Kubernetes certifications such as KCNA CKA or CKAD as well as those that completed Prometheus specific training or Cloud Engineer bootcamps
