Advanced Sensing and Robotics Technologies in Smart Agriculture Yuliang Yun, Wenyi Sheng, Zhao Zhang, 2024-08-27 This book

specifically focuses on state of the art advanced sensing and robotic techniques in smart agriculture and comprehensively describes the new knowledge Significant agricultural technology progress in advanced sensing and robotics technology has been made recently which has transformed the conventional agriculture to smart and digital agriculture It provides readers take away knowledge for seed quality detection specialty crop harvest and sorting robotics new sensing method for crop nutrient status and broadband soil dielectric permittivity measurements All these new technologies have been developed tested or practically applied It is a useful reference for readers in the field of smart agriculture and agriculture robotics

Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements Xueyan Liu,Kumar Anupam,Sandra Erkens,Lijun Sun,Jianming Ling,2021-12-24 *Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements* contains 124 papers from 14 different countries which were presented at the 5th International Symposium on Frontiers of Road and Airport Engineering IFRAE 2021 Delft the Netherlands 12 14 July 2021 The contributions focus on research in the areas of Circular Sustainable and Smart Airport and Highway Pavement and collects the state of the art and state of practice areas of long life and circular materials for sustainable cost effective smart airport and highway pavement design and construction The main areas covered by the book include Green and sustainable pavement materials Recycling technology Warm cold mix asphalt materials Functional pavement design Self healing pavement materials Eco efficiency pavement materials Pavement preservation maintenance and rehabilitation Smart pavement materials and structures Safety technology for smart roads Pavement monitoring and big data analysis Role of transportation engineering in future pavements *Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements* aims at researchers practitioners and administrators interested in new materials and innovative technologies for achieving sustainable and renewable pavement materials and design methods and for those involved or working in the broader field of pavement engineering

Innovative Technologies on Electrical Power Systems for Smart Cities Infrastructure Imad Aboudrar,Farhad Ilahi Bakhsh,Anand Nayyar,Ilias Ouachtouk,2025-04-17 This book compiles selected papers from the International Conference on Electrical Systems and Smart Technologies ICESST 2024 held in Dakhla Morocco December 11 13 2024 It presents key research insights offering a structured exploration of innovations in electrical systems and smart technologies The first section covers power electronics and electrical systems focusing on advanced control techniques electrical machines and drives It then transitions to computational intelligence and soft computing highlighting the role of machine learning and deep learning in enhancing modern electrical systems Next the book delves into IoT and embedded systems emphasizing their impact on smart infrastructure and smart cities addressing challenges and solutions in efficiency and effectiveness The smart grids and power systems section explores energy management renewable energy integration and forecasting underscoring sustainability in modern power systems This leads to a discussion on sustainable energy solutions covering hydrogen energy fuel cells storage systems and electrical mobility Finally the book examines automation robotics and control technologies

showcasing advancements in mechatronics industrial automation and AI driven robotics This comprehensive guide provides valuable insights into current trends challenges and future directions in electrical engineering and smart technologies making it essential for professionals researchers and students

Trust-Based Communication Systems for Internet of Things Applications Prateek Agrawal,Vishu Madaan,Anand Sharma,Dilip Kumar Sharma,Akshat Agrawal,Sandeep Kautish,2022-06-17 TRUST BASED COMMUNICATION SYSTEMS FOR INTERNET OF THINGS APPLICATIONS Highlighting the challenges and difficulties in implementing trust based communication systems for Internet of Things IoT services and applications this innovative new volume is a critical reference source for academics professionals engineers technology designers analysts and students The primary objective of this edited book is to deliver technologies to improve trust and eliminate malicious actors in participatory exchanges throughout communication using Internet of Things IOT devices such that these methods should not only be able to identify bad actors but also to improve communication and trust in the environment without violating object privacy Whether as a reference for the engineer or scientist or a textbook for the student this is a must have for any library

Mastering Efficient Memory Management in C++: Unlock the Secrets of Expert-Level Skills Larry Jones,2025-02-27 Unlock the full potential of your C programming prowess with Mastering Efficient Memory Management in C Unlock the Secrets of Expert Level Skills This comprehensive guide delves into the intricate world of memory management offering seasoned developers a deep dive into advanced techniques and strategies essential for creating high performance resource efficient applications Each meticulously crafted chapter provides a detailed exploration of critical topics from understanding memory models and architecture to mastering the complexities of smart pointers ensuring your software solutions remain robust scalable and optimal As modern applications grow in complexity the need for sophisticated memory management becomes imperative This book equips you with the knowledge necessary to identify and solve memory related challenges effectively with chapters dedicated to dynamic memory techniques memory allocation strategies and optimizing data structures for efficiency You ll gain proficiency in detecting and debugging memory leaks ensuring your applications are both secure and stable Furthermore with insights into cache optimization and managing concurrency you ll be able to fine tune your programs capitalizing on the intricacies of modern processor designs Mastering Efficient Memory Management in C is not just a technical manual it s an essential resource for any developer aiming to excel in C programming With expert tips and practical guidance this book enhances your understanding and application of advanced memory management techniques Whether integrating these strategies into new projects or refining existing ones you are empowered with the skills to elevate your software development practice ensuring every line of code is crafted with precision and efficiency

data and users effectively Finally you will explore emerging trends and innovations that are shaping the future of blockchain technology By the end of the course you will possess a solid mastery of blockchain fundamentals and advanced concepts empowering you to confidently engage with blockchain projects or further specialize in this dynamic field Smart Materials for Tissue Engineering Qun Wang,2017-05-03 In the last couple of decades research in the area of tissue engineering has witnessed tremendous progress The focus has been on replacing or facilitating the regeneration of damaged or diseased cell tissue or organs by applying a biomaterial support system and a combination of cells and bioactive molecules In addition new smart materials have been developed which provide opportunities to fabricate characterize and utilize materials systematically to control cell behaviours and tissue formation by biomimetic topography that closely replicate the natural extracellular matrix Following on from Smart Materials for Tissue Engineering Fundamental Principles this book comprehensively covers the different uses of smart materials in tissues engineering providing a valuable resource for biochemists materials scientists and biomedical engineers working in industry and academia *Leadership Paradigms and the Impact of Technology* Agnihotri, Alka,Balusamy, Balamurugan,2025-01-24 Leadership paradigms have evolved in recent years shaped by rapid advancements in technology and shifting organizational dynamics Traditional leadership models often characterized by hierarchical structures and top down decision making are giving way to more collaborative and adaptive approaches As technology fosters greater connectivity and access to information leaders embrace innovation diversity and inclusivity in their practices This transformation redefines the role of leaders while enhancing their ability to inspire and engage teams influencing organizational culture and performance Leadership Paradigms and the Impact of Technology explores the effects of new technological advancements on leaderships styles and practices It examines the use of machine learning artificial intelligence AI and neural networks for improved administration and leadership in organizations across sectors This book covers topics such as higher education sustainable development and machine learning and is a useful resource for administrators business owners education professionals policymakers computer engineers academicians and researchers **Intelligent Infrastructure** Nastaran Dadashi,David Golightly,Sarah Sharples,Richard Bye,2023-07-30 With the development of sensor technology wireless communications big data and machine learning there is an increasing interest in technologies and solutions that assess and predict the state of equipment and assets within various industrial settings These technologies aim to collect information from multiple sources about infrastructure asset status Then through current and historical data analysis this configuration of technologies delivers intelligence on current and future asset status to a maintenance operator or manager to inform optimal maintenance decision making These technologies are known under different terms remote condition monitoring e maintenance prognostic systems predictive maintenance and smart or intelligent infrastructure Despite the promise of remote condition monitoring and predictive technologies there is a growing concern with such technologies because they can be difficult or impractical to use Understanding and mitigating potential

human factors issues could ensure that such vast investments are not wasted This book considers in depth the challenges placed on users of current and future condition monitoring systems Its primary focus is to understand the cognitive processes including managing alarms interpreting data and collaborating with automation The book describes a range of human factors methods that can be used to understand the current and future functioning of people and technology in an enhanced maintenance and asset monitoring context The book also presents a framework for describing these issues systematically and presents the resulting design considerations to increase the effectiveness of individual operators and organisations as a whole *Smart Moves in Manual Handling Training Manual* ,1994

Rethink! Prototyping Christoph Gengnagel, Emilia Nagy, Rainer Stark, 2015-11-18 In this book the authors describe the findings derived from interaction and cooperation between scientific actors employing diverse practices They reflect on distinct prototyping concepts and examine the transformation of development culture in their fusion to hybrid approaches and solutions The products of tomorrow are going to be multifunctional interactive systems and already are to some degree today Collaboration across multiple disciplines is the only way to grasp their complexity in design concepts This underscores the importance of reconsidering the prototyping process for the development of these systems particularly in transdisciplinary research teams Rethinking Prototyping new hybrid concepts for prototyping was a transdisciplinary project that took up this challenge The aim of this programmatic rethinking was to come up with a general concept of prototyping by combining innovative prototyping concepts which had been researched and developed in three sub projects Hybrid Prototyping developed new prototyping approaches to validate and evaluate holistically developed systems with their services infrastructure and business models Blended Prototyping addressed a new technique whereby prototypes for user interfaces of software applications can be generated from hand drawings and immediately be tested Beyond Prototyping examined the issue of the prototype in connection with algorithmically generated design for producing tailor made products
