## **Smithville Chapter 4 Solutions:**

Christmas Sleigh Ride Diane M. Cece, 2016-09-22 Tyler Lacey was riding down the cattle trail looking for strays along the upper mountain ranges of the Flying T2 Rough Stock and Cattle Ranch. It was his job this month to be the line rider and move the cattle and strays to the lower meadows before winter set in. He was just about to ride deeper into the woods to look for more strays when he heard the sound of a wagon coming up the narrow trail. He knew it had no business being up here on the upper range land of his family's ranch. Deciding to check it out to see what was going on, he walked his horse Biscuit down the trail to see the approaching wagon. At first glance, he was startled to see a young woman at the reins of an old small canvas-covered wagon. Calico Gunderson had made two wrong turns with her mule team on the way to her uncle's Broken Arrow Ranch outside Smithville, Arizona. She found herself going up a mountain trail in the wrong direction. The trail was getting very narrow the farther along she drove, and she found she could not turn the mule team and wagon around. She halted the wagon and picked up her shotgun in self-defense when she noticed a rider coming down the cattle trail toward her.

**The Environmental Pendulum** R. Allan Freeze, 2023-04-28 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media. Underkill is followed by overkill. Concern breeds action; disillusion breeds reaction. The Environmental Pendulum provides a thoughtful and evenhanded assessment of this conflict. Tens of thousands of sites across the country are contaminated with toxic chemicals. Environmentalists warn us that this legacy of carelessness is seriously affecting both human health and the ecological balance of nature. They point out that even improved industrial practices will not eliminate future chemical releases to the environment. Their demand for regulatory control has received wide public support and led to the passage of the Superfund legislation in 1980. Now, after twenty years, the value of the Superfund program is being challenged by corporate America, which argues that excessive cleanup costs have the potential to bankrupt the nation. R. Allan Freeze outlines the difficulties associated with the management of hazardous waste and offers a balanced account of the controversy over the role of environmental contamination in human health. Freeze clarifies what matters and what doesn't with respect to chemical contaminants in the environment, arguing that environmental policies should be based on an accurate appraisal of the risks associated with these toxins. He concludes the book with a brilliant summation of the good news and the bad news of environmental pollution, describing what can and cannot be done to bring the situation under control.
