Introduced in 1902, the .308 Winchester is probably the widest cartridge still in common use on a world wide scale. To say that the .308 has been successful would be an understatement of monumental proportions. Today, the cartridge is not only holding its own, but is actually gaining in popularity. It received a big boost in 1985, when the U.S. military adopted the .308 Winchester as the "new" cartridge for service rifles. In addition to its military duties, the .308 has been embraced by many local, state, and federal law enforcement agencies as well. Ever since the days of the wild west, the idea of a rifle/shotgun combination in the same caliber has always been a concept unique to America. This notion has given rise to a number of rifle/shotgun combinations for cartridges normally associated with handguns. The .308 Winchester is one of them.

Many of the rifles chambered for the 9mm are carbine-length, semi-automatic copies of submachineguns, such as the Uzi carbine, and the HKC 94, a variant of the MP5. Our test rifle was the Mauser Model 9 Camp Carbine, an original design. Despite the differences in their appearance, all of these rifles are basically suited to the same range of tasks: small game, varmints, and plinking. Kris Hachlbaum, a highly respected gunwriter and defensive shooting instructor, has recommended the Camp Carbine as a viable candidate for home defense. For shooters unable to master the heavier recoil of a shotgun, or unable to obtain a handgun due to local ordinances, this is a feasible option.

While the 7mm may qualify as a fairly powerful pistol cartridge, it is rather anemic in a rifle. Whether used in a rifle or handgun, the 7mm is neither adequate nor suitable for use on big game. When loaded with the lighter weight bullets, which showed the greatest increase in velocity over handgun data, the 7mm is effective for small game and varmints out to 30 or 75 yards. When used within its limitations, the 7mm Luger in a rifle can be an acceptable combination.
