Silent Spring By Rachel Carson Houghton Mifflin October 28 196:

Invisible Lines Maxim Samson,2024-02-13 An indispensable guide to seeing and understanding our planet through the divisions we make find or feel Our world has innumerable boundaries They range from the obvious an ocean or a mountain range to subtle differences in language or climate We cross boundaries all the time sometimes without realizing it They can be subjective our perceptions of a boundary may not be shared by others And yet they shape the way we engage with the world Geographer Maxim Samson examines invisible lines exploring the ways in which we divide this world from meteorology and ecology to race and religion and how they allow us to define insiders and outsiders to identify places where particular attention and resources are especially urgent to distinguish between two sides two groups two futures From segregation along Detroit's infamous 8 Mile to herds of red deer that still refuse to cross the former Iron Curtain the existence or perceived existence of dividing lines has manifold implications for people wildlife and places Vividly written and illustrated with maps *Invisible Lines* is a compelling exploration of boundaries in all their consistency and all their messiness too

Navigating Environmental Attitudes Thomas A. Heberlein,2012-08-27 The environment and how humans affect it is more of a concern now than ever We are constantly told that halting climate change requires raising awareness changing attitudes and finally altering behaviors among the general public and fast New information attitudes and actions it is conventionally assumed will necessarily follow one from the other But this approach ignores much of what is known about attitudes in general and environmental attitudes specifically there is a huge gap between what we say and what we do

Solving environmental problems requires a scientific understanding of public attitudes Like rocks in a swollen river attitudes often lie beneath the surface hard to see and even harder to move or change In *Navigating Environmental Attitudes* Thomas Heberlein helps us read the water and negotiate its hidden obstacles explaining what attitudes are how they change and influence behavior Rather than necessarily trying to change public attitudes we need to design solutions and policies with them in mind He illustrates these points by tracing the attitudes of the well known environmentalist Aldo Leopold while tying social psychology to real world behaviors throughout the book Bringing together theory and practice *Navigating Environmental Attitudes* provides a realistic understanding of why and how attitudes matter when it comes to environmental problems and how by balancing natural with social science we can step back from false assumptions and unproductive frustrating programs to work toward fostering successful effective environmental action With lively prose inviting stories and solid science Heberlein pilots us deftly through the previously uncharted waters of environmental attitudes It s a voyage anyone interested in environmental issues needs to take Robert B Cialdini author of *Influence Science and Practice*

Navigating Environmental Attitudes is a terrific book Heberlein s authentic voice and the book s organization around stories keeps readers hooked Wildlife biologists natural resource managers conservation biologists and anyone else trying to solve environmental problems will learn a lot about attitudes behaviors and norms and the fallacy of the Cognitive Fix Stephen Russell Carpenter Stephen Alfred Forbes Professor of Zoology University of Wisconsin Madison People who have spent their lives dealing with environmental issues from a broad range of perspectives consistently abide by erroneous assumption that all we need to do to solve environmental problems is to educate the public I consider it to be the most dangerous of all assumptions in environmental management In *Navigating Environmental Attitudes* Tom Heberlein brings together expertise in social and biophysical sciences to do an important kind of science education educating eminent scientists about the realities of their interactions with the broader public the late Bill Freudenburg Dehlsen Professor of Environment and Society University of California Santa Barbara

The Fifties James R. The Rise of the Right to Know Michael Schudson, 2015-09-14 Modern transparency dates to the 1950s 1960s and 1970s well before the Internet Michael Schudson shows how the right to know has defined a new era for democracy less focus on parties and elections more pluralism and more players year round monitoring of government and a blurring line between politics and society public and private

Ghostworkers and Greens Adam Tompkins, 2016-04-19 Throughout the twentieth century despite compelling evidence that some pesticides posed a threat to human and environmental health growers and the USDA continued to favor agricultural chemicals over cultural and biological forms of pest control In *Ghostworkers and Greens* Adam Tompkins reveals a history of unexpected cooperation between farmworker groups and environmental organizations Tompkins shows that the separate movements shared a common concern about the effects of pesticides on human health This enabled bridge builders within the disparate organizations to foster cooperative relationships around issues of mutual concern to share information resources and support Nongovernmental organizations particularly environmental organizations and farmworker groups played a key role in pesticide reform For nearly fifty years these groups served as educators communicating to the public scientific and experiential information about the adverse effects of pesticides on human health and the environment and built support for the amendment of pesticide policies and the alteration of pesticide use practices Their efforts led to the passage of more stringent regulations to better protect farmworkers the public and the environment Environmental organizations and farmworker groups also acted as watchdogs monitoring the activity of regulatory agencies and bringing suit when necessary to ensure that they fulfilled their responsibilities to the public These groups served as not only lobbyists but also essential components of successful democratic governance ensuring public participation and more effective policy implementation
