

Silent Spring

by Rachel Carson

--Review by Jenie M. Bacay

BSCE 1B

Deadly poison, extinction, death and destruction; words yet so powerful that could imprint fear to everyone. Nature is suffering. Plants wither, fish are poisoned, bird's loss their home, rivers and sea were polluted and mountains were deserted. It's not exaggerated but a reality. Nature's agony is definitely a scream for a humanity to open their eyes, ears and hands to see how foreign it has become, to hear the deaf- silence of the animals as they are gone, and for us to open a hand to help in order for them to recuperate and survive. Nature becomes vulnerable because of human intervention specifically the irresponsible way of treating it such as continuous altering and overuse of resources.

Rachel Carson took an opportunity to wake us not just Americans through her book "Silent Spring". The Silent Spring is an environmental science book, published on September 27, 1962, documenting the adverse environmental effects caused by the indiscriminate use of pesticides. In this book, Carson accused the chemical industry of spreading disinformation, and public officials of accepting the industry's marketing claims unquestioningly. These entails that we've become irresponsible, greedy and careless towards nature only just to attain what we want disregarding its effects in nature and the other living things on it. We become self- centered and selfish. We prioritize our own needs and wants and neglected the welfare of the others. As Carson said, "Man's attitude toward nature is today critically important simply because we have now acquired a fateful power to alter and destroy nature. But man is a part of nature, and his war against nature is inevitably a war against himself? [We are] challenged as mankind has never been challenged before to prove our maturity and our mastery, not of nature, but of ourselves."

This book is an instrument for everyone, for the humanity to remind us that we are dependent on nature; we can't live if it is destroyed, this is where we get our stuffs in order to survive in our daily lives. As to why we need to take action it's because nature need us too. Mother nature needs us to aid and protect her.

biocatalysts and the methodologies and processes associated with it on an industrial scale is biochemical engineering. Biochemical engineering is applicable in different areas of biotechnology such as biochemical reactions, enzyme technology, environmental biotechnology, microbial manipulations, bioseparation technology, plant and animal cell cultures, and food technology. It consists of the development of new process technology, designing bioreactors, developing efficient and economically feasible extraction and purification procedures, downstream processing. Chapter 1 and 2 discuss about the basic concept of biotechnology and biochemical engineering. Chapter 3 tells about the concept of enzyme kinetics, their evolution and use in biochemical engineering. Chapter 4 and 5 describe immobilized enzyme and industrial applications of enzymes. Chapter 6 depicts about industrial microbiology. This chapter discusses different concepts about fermentation process, cell products, and other modified compounds. Chapter 7 tells about different types of cell cultivations in microbial, animal, and plant. Chapter 8 discusses about the fermentation process and its control. Chapter 9 and 10 describe cell kinetics and fermenter design and also how the cell grows. Chapter 11 discusses about the bioreactor design. Chapter 12 depicts the downstream processing, centrifugation, sedimentation, and other technology. Chapter 13 tells about the sterilization.

Contemporary Issues in Australian Urban and Regional Planning, Julie Brunner, John Glasson, 2015-05-15. Contemporary Issues in Australian Urban and Regional Planning looks at a wide range of planning issues in Australia from the city to the regional scale, covering key topics in sustainable development and planning, including economic, social, environmental, and governance perspectives. It also covers issues of climate change, population, and urbanization trends, economic competitiveness, and the Quadruple Bottom Line (QBL) Sustainability agenda. The book is organized around three key elements: Pressures and Principles of development and planning for sustainability; Planning Practice and Processes focused on essential topics including cities, regions, rural areas, and social and environmental issues; and Future Processes and Prospects for planning practice and education, covering the fundamental issues of assessing sustainability, managing risk, effective participation, and evolving approaches to planning education. Contemporary Issues in Australian Urban and Regional Planning is an invaluable resource for students and practitioners of planning and related fields and provides a critical perspective on current issues in evolving natural and socio-economic contexts in Australian planning.

The Journal of Agricultural Economics Research, 1988. **Is It Safe?** Sarah A. Vogel, 2012-12-20. We are all just a little bit plastic. Traces of bisphenol A or BPA, a chemical used in plastics production, are widely detected in our bodies and environment. Is this chemical and its presence in the human body safe? What is meant by safety? Who defines it and according to what information? Is It Safe narrates how the meaning of the safety of industrial chemicals has been historically produced by breakthroughs in environmental health research, which in turn trigger contests among trade associations, lawyers, politicians, and citizen activists to set new regulatory standards. Drawing on archival research and extensive interviews, author Sarah Vogel explores the roots of the contemporary debate over the safety of BPA and the concerns presented by its estrogen-like effects, even at

low doses Ultimately she contends that science alone cannot resolve the political and economic conflicts at play in the definition of safety To strike a sustainable balance between the interests of commerce and public health requires recognition that powerful interests will always try to shape the criteria for defining safety and that the agenda for environmental health research should be protected from capture by any single interest group *U.S. Government Research & Development Reports* ,1969 **Teaching Authentic Language Arts in a Test-Driven Era** , *Managing Natural Resources* Gerard George,Simon J.D.
