### **Popping the Higher Education Bubble: How to Navigate the Impending Student Loan Crisis** Mike

Fishbein, 2014-04-17 Cheap credit on student loans coupled with widespread beliefs of ever increasing returns on investment has caused college tuition to vastly outpace inflation and family incomes From 1976 to 2010 commodities prices rose 280% and homes prices rose 400% while private education rose an incredible 1000% While the price of education has skyrocketed the value of a degree has not kept pace The increase in supply of degree holders has created an imbalance in the labor market In 1940 only one in 20 Americans held a college degree By 1977 that number had soared to one in four Over the past 30 years higher education has gone from facilitating upward mobility to exacerbating inequality For the first time in history the majority of unemployed Americans attended college and it is no more expensive than ever to go to college Student debt is now greater than 1 trillion and many graduates are unable to secure employment sufficient to pay off these loans As a result students are increasingly beginning to default on these loans Popping the Higher Education Bubble discusses the causes of the economic bubble the harmful effects it has had potential solutions to the problems an analysis of whether college is still a wise purchase and more The higher education bubble has many similarities to the housing bubble By comparing the student loan bubble to the mortgage bubble this book also identifies potential outcomes and investment opportunities were the student debt bubble to pop

**Choice Architecture Versus Price** Xiaoling Ang, 2016 We show that changes in choice architecture have a large effect on student loan decisions while we do not find significant effects of sizeable interest rate changes We evaluate the effect of two policies implemented in 2010 by the U S Department of Education 1 the requirement that all applicants for private student loans fill out a Self Certification Form which includes various disclosures about federal aid and 2 the prohibition of presenting a private student loan as a default option on a financial aid offer without disclosure of the relationship between the school and the creditor Using difference and difference and matching techniques on a proprietary dataset of private student loan originations from the Consumer Financial Protection Bureau and survey and administrative data from the Department of Education we show that these changes decreased private student loan originations by 33% at public four year institutions 18% at private not for profit four year institutions and 55% at four year for profit institutions In contrast we find no consumer response when analyzing 60 basis point decrease in the price of federal Parental PLUS loans at some schools using same datasets and similar estimation techniques
