Handbook of Phenomenological Aesthetics Hans Rainer Sepp,Lester Embree,2010-03-11 Historically phenomenology began in Edmund Husserl s theory of mathematics and logic went on to focus for him on transcendental rst philosophy and for others on metaphysics philosophical anthropology and theory of interpretation The c tinuing focus has thus been on knowledge and being But if one began without those interests and with an understanding of the phenomenological style of approach one might well see that art and aesthetics make up the most natural eld to be approached phenomenologically Contributions to this eld have continually been made in the phenomenological tradition from very early on but so to speak

along the side The situation has been similar with phenomenological ethics A great deal of thought about art and aesthetics has nevertheless accumulated during a century and a handbook like the present one is long overdue The project of this handbook began in conversations over dinner in Sepp's apartment in Baden Baden at one evening of the hot European summer in the year 2003 As things worked out he knew more about whom to ask and how much space to allocate to each entry and Embree knew more about how to conduct the inviting preliminary editing and prodding of contributors who were late returning their criticized drafts and copyedited entries and was able to invest the time and other resources from his endowed chair That process took longer than anticipated and there were additional unfortunate delays due to factors beyond the editors's control

French Women in Politics: Writing Power Raylene L. Ramsay, 2003 Although more women in France have entered political life than ever before the fact remains that there are fewer women representatives in the French parliament than there were after the Second World War In a new and original approach the author presents an overview and analysis of the emerging body of text by or on women who have held high political office in France The argument is that writing about women and politics has not just described or reflected women's slow but now substantial entry into political life it has played a major part in shaping the parity debate and its outcomes Interviews with political women such as Huguette Bouchardeau Simone Veil or Edith Cresson inserted in the text demonstrate the emergence and circulation of a new common discourse focused on the issue of whether women in politics make or should make a difference A close reading of the various texts examined in this book and their connection to new public counter discourses in France suggest that a re-writing of power is indeed occurring
