developing a personal academic voice and identity and a well crafted text With points for reflection alongside examples from a broad range of disciplines the book offers thinking tools writing tools linguistic tools and reading tools which are relevant to all stages of doctoral research This practical text can be used in all university doctoral training and composition and writing courses However it is not a dry how to do it manual that ignores debates or focuses solely on the mechanical at the expense of the lived experience of doctoral research It provides a practical theorised real world guide to postgraduate writing
