Talk Reform D. M. Gahagan,G. A. Gahagan,2025-05-09 Originally published in 1970 Talk Reform describes the development of an exploratory language enrichment programme devised by the authors and carried out by teachers in a group of primary schools in a working class area of London Inspired by Bernstein s theory of different language codes and their relation to educational underachievement the authors devised a series of situations in the classroom as preconditions for extending language use Their aim was to reorient the reader to the social functions of language so that teachers who understood the ideas behind this programme would be able to carry out the activities described as well as those they may have thought up for themselves The kinds of problems encountered when trying to judge the value of intervention and change in the classroom are discussed and illustrated from the authors own research The authors put forward the view that the social and linguistic skills that could be acquired in the way outlined in their book were crucial to the advancement of the working class child in the social system Today it can be read in its historical context **Proceedings of the International Conference on Learning and Advanced Education (ICOLAE 2022)** Mauly Halwat Hikmat,Yasir Sidiq,Naufal Ishartono,Yunus Sulistyono,Patmisari,Susiati,2023-08-29 This is an open access book The COVID 19 pandemic in the last two years has influenced how educational system works Online learning became the primal policy taken by all institutions in the world to lower the risk of the virus spread Despite the drawbacks of the online learning teachers and students were accustomed with the distant learning through web meetings Learning Management Systems LMS and other online learning platforms In that time topics under digital learning and education 5 0 were the main stakes in academic disseminations This year some institutions start to conduct their teaching and learning process classically as before the pandemic others are still continuing online and not few are in hybrid This leaves a question what learning reform should be made in post pandemic era This conference invites researchers experts teachers and students to discuss the coping solutions of the question It is important for them to contribute to the understanding of re imaging online education for better futures innovative learning design new skills for living and working in new times global challenge of education learning and teaching with blended learning flipped learning integrating life skills for students in the curriculum developing educators for the future distance learning humanities learning in the digital era assessment and measurement in education challenges and transformations in education technology in teaching and learning new learning and teaching models Not limited to these scholars may add
