Romance in the Digital Game Amy Brierley-Beare,2025-09-30 In the last decade the popularity of romance in the AAA game has exploded It has become an expectation for major releases and a regular object of fan obsession High profile games such as Baldur s Gate III 2023 Cyberpunk 2077 2020 and Starfield 2023 prominently feature in game romance in their multimillion dollar promotional campaigns Moreover rampant speculation by gaming journalists and fans about who is romanceable will regularly accompany the announcement of a new title However representations of romance have long been under examined and vaguely defined by scholars This leaves important questions unanswered How does the digital game mediate cultural attitudes towards love and sex How can we classify representations of romance in the digital game Does romance simply replicate existing hegemonies surrounding gender and sexuality or does it offer a space for transgressive play Book title positions optional romance in the AAA game as a central object of analysis Based on the close analysis of some of the most commercially and culturally significant games of the last 30 years like Grand Theft Auto IV 2008 the Mass Effect series 2007 21 and the Elder Scrolls series 1994 2024 it is the first full length monograph

to effectively and comprehensively categorise how mainstream gaming asks its audience to engage with romance. It interrogates the idiosyncrasies of romance in the popular games to provide fresh insights into messaging surrounding normative social understandings of love, sex and intimacy. By theorising four representational categories of romance: Limerent, Physical, Domestic and Ludic, Automatic Love introduces a new theoretical framework for scholars to understand romance, gender and sexuality in gaming.

Translation Flows Ilse Feinauer, Amanda Marais, Marius Swart, 2023-10-15. The genesis of this book was the 9th Congress of the European Society for Translation Studies held in Stellenbosch, South Africa, in September 2019, the first time the event took place outside Europe. Living Translation: People, Processes, Products was the Congress theme. A common thread, whether as a methodological or analytical basis, as a descriptive framework or as a subject in itself, was that of flows and the flowing nature of translation. The contributions included here draw on a productive framework of networks and flows and foreground the inherent spatial and temporal diversity of Translation Studies. Translation as a social practice is the golden thread throughout the volume, not just translation in the conventional sense between languages and cultures but over artificial borders into new spaces between non-traditional agents and actors and through various genres and mediums. Chapters are clustered loosely based on the temporality of the topic under discussion. Work on and from the Global North constitutes the first section and the second complements this by bringing the Global South into the picture as well. This state-of-the-art research will stimulate robust scholarly discussions as we map our way forward as a living discipline.
