The Business of Doing Business

Ibrahim Hanif, 2020-09-02

In my eight years helping business owners solve problems I have witnessed three obstacles get in the way of the most number of entrepreneurs These problems largely diminish a business's potential while exerting pressure on the company's budget and the owner's peace of mind The first problem many entrepreneurs face is the inability to network Business networking is the best way to grow one's business and new business owners unable to build connections are left with fewer opportunities That is especially true for the owners of

SMEs The next issue is faced by those who seem successful but have little to no peace of mind By not appropriately automating their business they are trapped in the grind Finally comes the problem that affects established businesses and enterprises that are just starting out equally It is the inability to use social media to grow their business I decided to write an article for each of these problems These articles first circulated among my clients privately and then made it to public distribution The feedback I received compelled me to put together this compilation and publish it in the form of an eBook for business owners offline reading and reference purposes
