*Statewide Exit Exams, Governance, and School Development* Esther Dominique Klein, 2013 In the context of outcomes based school governance statewide exit exams are often expected to have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school instructional and professional development However very little is known about whether the exams are used for development at all and how this is affected by factors in the exam system and organizational aspects of schools In a comparison of Finland Ireland and the Netherlands the study therefore investigates how different exam systems and their functions the conditions at school level and the use of the exams for school and classroom development are associated The study uses expert interviews and a questionnaire survey with principals and teachers The role statewide exit exams can play in education systems is analyzed from a governance perspective and a school development perspective and discussed with an international comparative view Esther Dominique Klein born in 1982 Dr phil is research assistant at the Faculty of Educational Sciences of the University of Duisburg Essen Her main research interests lie in the areas of school system and school development research and international comparative education **Public**

**Examinations Examined** Thomas Kellaghan, Vincent Greaney, 2019-11-19 High stakes public examinations exert a dominant influence in most education systems They affect both teacher and student behavior especially at the middle and upper levels of secondary education The content of past examinations tends to dictate what is taught and how it is taught and more important what is learned and how it is learned By changing aspects of these examinations especially their content and format education systems can have a strong positive impact on teacher behavior and student learning help raise student achievement levels and better prepare students for tertiary level education and for employment Examination agencies many of which have followed the same procedures over decades can learn from the successes and failures of other systems This book addresses current issues related to the development administration scoring and usage of these high stakes public examinations identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies The book's primary audience consists of public examination officials on national regional and state examination boards but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards to academics and researchers interested in educational assessment to governmental and education agencies responsible for student selection and to professionals at development organizations This extremely well written and comprehensive book offers a timely review of the diversity of public examination practices worldwide of the tensions between examinations and learning and of the technical expertise involved in the creation of valid reliable and fair assessments It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide and the commercial business of testing flourishes those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog Angela W Little Professor Emerita
