The Philosophy Of Perception Phenomenology And Image Theory:

The Philosophy of Perception Lambert Wiesing, 2014 *The Palgrave Handbook of Image Studies* Krešimir Purgar, 2021-10-01 This handbook brings together the most current and hotly debated topics in studies about images today In the first part the book gives readers an historical overview and basic diachronical explanation of the term image including the ways it has been used in different periods throughout history In the second part the fundamental concepts that have to be mastered should one wish to enter into the emerging field of Image Studies are explained In the third part readers will find analysis of the most common subjects and topics pertaining to images In the fourth part the book explains how existing disciplines relate to Image Studies and how this new scholarly field may be constructed using both old and new approaches and insights The fifth chapter is dedicated to contemporary thinkers and is the first time that theses of the most prominent scholars of Image Studies are critically analyzed and presented in one place Philosophy of Dance Peter A. French, Howard K. Wettstein, Patrick Londen, 2020-01-21 This volume brings together new work in the philosophy of dance for a general philosophical audience Scholars working across the fields of philosophy dance studies and related areas explore the nature of dance as a practice and an artform This collection of essays covers topics such as the experience of dancing the nature and appreciation of dance artworks and the distinctive contribution of dance to philosophical understanding **Self and Affect** Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness *The Routledge Companion to Photography Theory* Mark Durden, Jane Tormey, 2019-11-07 With newly commissioned essays by some of the leading writers on photography today this companion tackles some of the most pressing questions about photography theory s direction relevance and purpose This book shows how digital technologies and global dissemination have radically advanced the pluralism of photographic meaning and fundamentally transformed photography theory Having assimilated the histories of semiotic analysis and post structural theory critiques of representation continue to move away from the notion of original and copy and towards materiality process and the interdisciplinary The implications of what it means to see an image is now understood to encompass not only the optical but the conceptual ethical and haptic experience of encountering an image The fractal is now used to theorize the new condition of photography as an algorithmic medium and leads us to reposition our relationship to

photographs and lend nuances to what essentially underlies any photography theory that is the relationship of the image to the real world and how we conceive what that means Diverse in its scope and themes The Routledge Companion to Photography Theory is an indispensable collection of essays and interviews for students researchers and teachers The volume also features extensive images including beautiful colour plates of key photographs **Images, Reality, and Digital Culture** Krešimir Purgar, 2025-09-30 Focusing on the moment of transition from the pictorial to the post pictorial condition this book advocates the opinion that what fundamentally distinguishes pictorial representation in Western civilization is one's ability to distinguish what the picture shows from what the picture refers to and to that extent the reality inside the picture cannot be confused with what is outside it The contributions in this book serve as kind of a missing link connecting the genealogy of traditional images with contemporary environmental visualizations in the world that in this very moment undergoes a transition into a new exciting age in which many old knowledges are rapidly becoming obsolete and new ones are seeking their legitimacy Instead of leading the reader to reconciliation with the fatal diagnosis of the world under the rule of technological determinism this book indicates the key points of transition between the pictorial representation that traditionally belonged to the history of art and the virtual presence that is approached in quite different ways today This book will be of interest to scholars working in art history image philosophy image studies and digital studies

analytic epistemology and philosophy of mind Provides clear prose explanations of the necessary distinctions and arguments required for understanding the subject Places knowledge at the center of phenomenological inquiry *Quasi-Things* Tonino Griffero, 2017-03-15 In this book Tonino Griffero introduces and analyzes an ontological category he terms quasi things These do not exist fully in the traditional sense as substances or events yet they powerfully act on us and on our states of mind He offers an original approach to the study of emotions regarding them not as inner states of the subject but as atmospheres that is as powers poured out into the lived space we inhabit Griffero first outlines the general and atmospheric characters of quasi things and then considers examples such as pain shame the gaze and twilight which he argues is responsible for penetrating and suggestive moods precisely because of its vagueness With frequent examples from literature and everyday life *Quasi Things* provides an accessible aesthetic and phenomenological account of feelings based on the paradigm of atmospheres *The Oneiric in the Films of David Lynch* Raphael Morschett, 2024-06-27 *The Oneiric in the Films of David Lynch* is the first systematic book length study to explore the nature and function of dreams in David Lynch's different phases and audio visual formats There is hardly a contemporary film director whose name is as closely linked to the dream like as that of David Lynch Both popular and academic discourse frequently identify Lynch's films by their dreamlike qualities However in the existing literature on Lynch these qualities tend to remain underspecified in terms of their experiential dimension Departing from an interest in the phenomenon of dream experience this is the first systematic book length study exploring the nature and function of the oneiric in the director's different phases and audio visual formats It shows that over the course of 50 years Lynch has developed a cinematic aesthetics of the oneiric an ensemble of four dream related dimensions that unfolds its full potential in the dynamic interplay between sensory address and reflective medialization On the one hand the Lynchian oneiric presents a markedly sensory perceptual mode of experience both characters and viewers are challenged in their perceptual patterns while at the same time being immersed in the material dream scenario On the other hand the Lynchian oneiric provides a mode of both psychological and medial reflection Not only the characters but the films themselves are inclined to turn back on themselves in a dream exploring the preconditions possibilities and limitations of their own existence and ability to know the world The oneiric in Lynch's films is thus of phenomenological media theoretical and philosophical interest **Empiricisms** Barry Allen, 2021 *Empiricisms* is about the value of experience and experiments Why do we esteem them and what is their contribution to knowledge The work is unique in the detail with which it explains empiricism from its beginning in ancient medicine to its emergence as a philosophy of modern science It elucidates the ideas of the so called radical empiricists clarifying their relation to historical empiricism and explaining what is radical about them and develops a comparison between European empiricism and ideas and practice in traditional China Bringing China into the argument is an unexpected innovation and makes the work a model for comparative philosophy *Social Research Methodology and Publishing Results: A Guide to Non-Native English Speakers* Saliya, Candauda

Arachchige,2023-03-10 While there are many English books available on academic research methods and philosophy many complain that they are difficult for budding non native English speaking researchers to use and understand Rather than hiding behind jargon writers should describe and define the concepts for the benefit of non native English speakers Social Research Methodology and Publishing Results A Guide to Non Native English Speakers explains methods commonly used in the field of academic research provides stimulus to non native English speaking researchers for successful implementation of academic research and meets the need for an appropriate course framework and materials for teaching research methodology Covering topics such as pragmatism research design and empirical modeling this premier reference source is a dynamic resource for educators and administrators of higher education pre service teachers librarians teacher educators non native English speaking researchers and academicians How We Use the Media Benjamin Krämer,Felix Frey,2020-11-06 This volume considers strategies modalities and styles of media use and reception Dynamic changes in media technology and infrastructure have spurred important changes in media use Looking at these developments within the common conceptual framework of reception strategies modes and styles of media use and reception this volume is highly relevant against the background of the changing media environment When it comes to media use and reception communication research has mainly dealt with two much cited questions What do the media do with the people What do the people do with the media In comparison the discipline has devoted less attention to how the media are used the modalities patterns or configurations of the actual practices of media use The volume features original contributions both empirical and theoretical on the key concepts and approaches in the field covering old and new media and different types of media content Offering a comprehensive overview of existing research as well as promoting original findings and insights the volume will be of interest to communication researchers students and scholars *Film, Theory and Philosophy* Felicity Colman,2014-12-05 Philosophy and in particular continental philosophy has provided a conceptual underpinning for cinema since its beginnings especially in the development of cinematic aesthetics In its turn film has rethought the abstractions of space and time and the categories of sex and gender and has created new concepts which illuminate phenomenology metaphysics and epistemology Film and Philosophy brings together leading scholars to provide a detailed overview of the key thinkers who have shaped the field of film philosophy The thinkers include continental and post continental philosophers analytic philosophers film makers film reviewers sociologists and cultural theorists The essays reveal how philosophy can be applied to film analysis and how film can be used to illustrate philosophical problems But more importantly the essays explore how film has shaped what philosophy thinks and how philosophy has lead to a reappraisal of film The book will prove an invaluable reference and guide to readers interested in a deeper understanding of the issues and insights presented by film philosophy Film and Philosophy includes essays on Hugo Munsterberg Vilem Flusser Siegfried Kracauer Theodor Adorno Antonin Artaud Henri Bergson Maurice Merleau Ponty Emmanuel Levinas Andre Bazin Roland Barthes Serge Daney Jean Luc Godard Stanley Cavell Jean

Philosophy's Nature: Husserl's Phenomenology, Natural Science, and Metaphysics Emiliano Trizio,2020-08-31 This book offers a systematic interpretation of the relation between natural science and metaphysics in Husserl s phenomenology It shows that Husserl s account of scientific knowledge is a radical alternative to established methods and frameworks in contemporary philosophy of science The author s interpretation of Husserl s philosophy offers a critical reconstruction of the historical context from which his phenomenological approach developed as well as new interpretations of key Husserlian concepts such as metaphysics idealization life world objectivism crisis of the sciences and historicity The development of Husserl s philosophical project is marked by the tension between natural science and transcendental phenomenology While natural science provides a paradigmatic case of the way in which transcendental phenomenology ontology empirical science and metaphysics can be articulated it has also been the object of philosophical misunderstandings that have determined the current cultural and philosophical crisis This book demonstrates the ways in which Husserl shows that our conceptions of philosophy and of nature are inseparable Philosophy s Nature will appeal to scholars and advanced students who are interested in Husserl and the relations between phenomenology natural science and metaphysics
