The Place Of Mind:

The Place of the Mediterranean in Modern Israeli Identity Alexandra Nocke, 2009-03-25 While early Zionists envisioned the Jewish state as an outpost of Europe in the Middle East modern Israel is geographically speaking located in Asia and incorporates elements from both Orient and Occident This book sheds light on how the Mediterranean region its history traditions climate and attitudes have shaped Israeli lived experience and consciousness It offers new perspectives on the evolving phenomenon of Yam Tikhoniut hebr Mediterraneanism which centers around the longing to find a natural place in order that Israel be accommodated in the region both culturally and politically This book explores Mediterraneanism as reflected in popular music literature architecture and daily life and analyzes the ways in which the notion comprises cultural identity societal concepts and political realities

Metaphors of Mind Brad Pasanek, 2015-07-01 A pathbreaking introduction to eighteenth century metaphors of the mind that recasts the grand narrative of the Enlightenment in terms of its tropes and figures An encyclopedic dictionary along the lines of Voltaire s classic Dictionnaire Philosophique *Metaphors of Mind* provides an in depth look at the myriad ways in which Enlightenment writers used figures of speech to characterize the mind Drawn from Brad Pasanek s massive online archive <http://metaphorized.net> this volume constitutes a veritable treasury of mental metaphors Dividing the book into eleven broad metaphorical categories Animals Coinage Court Empire Fetters Impressions Inhabitants Metal Mirror Rooms and Writing Pasanek maps out constellations of metaphors He frames his collection of literary excerpts in each section with a more descriptive and theoretical discussion of what he calls desultory reading a form of unsystematic perusal of writing frequently employed by Enlightenment thinkers By surveying the printed past alongside the digital present the book treats eighteenth century writing as its topic while essentially exemplifying its rhetorical approach More than an exercise in quotation this intellectual history offers illuminating readings of fragmentary literary works and confrontations with neoclassical and contemporary theories of metaphor The book s entries complicate received ideas about Locke s blank slate question M H Abrams claims about mirrors and lamps and chart changing frequencies of metal metaphors in a moment of industrial revolution The book also responds to current anxieties about reading and the mass digitization of literature touching on recent discussions of distant reading shallow reading and surface reading Promoting critical and creative anachronism *Metaphors of Mind* redefines the notion of an archive in the age of Amazon and Google Books

Philosophy for the Science of Animal Consciousness Walter Veit, 2023-06-16 This book attempts to advance Donald Griffin s vision of the final crowning chapter of the Darwinian revolution by developing a philosophy for the science of animal consciousness It advocates a Darwinian bottom up approach that treats consciousness as a complex evolved and multidimensional phenomenon in nature rather than a mysterious all or nothing property immune to the tools of science and restricted to a single species The so called emergence of a science of consciousness in the 1990s has at best been a science of human consciousness This book aims to advance a true Darwinian science of consciousness in which its evolutionary origin function and phylogenetic diversity are moved from the field s periphery to its very centre thus enabling us to integrate consciousness into an evolutionary view of life Accordingly this book has two objectives i to argue for the need and possibility of an evolutionary bottom up approach that addresses the problem of consciousness in terms of the evolutionary origins of a new ecological lifestyle that made consciousness worth having and ii to articulate a thesis and beginnings of a theory of the place of consciousness as a complex evolved phenomenon in nature that can help us to answer the question of what it is like to be a bat an octopus or a crow *A Philosophy for the Science of Animal Consciousness* will appeal to researchers and advanced students interested in advancing our understanding of animal minds as well as anyone with a keen interest in how we can develop a science of animal consciousness New Church Essays on Science, Philosophy and Religion , 1854

Returning to Karl Popper Alexander Naraniecki, 2014-01-10 Over the last few years there has been a resurgent interest in various scientific disciplines in Popper s arguments To gain a greater appreciation of Popper s scientific arguments they need to be viewed in relation to his broader philosophy and where this stands within the history of ideas This book aims to take seriously those aspects of Popper s writings that have received less attention and wherein he advanced metaphysical speculative mystical poetic aesthetic and Platonic arguments Such arguments are crucial for an appreciation of his scientific and political writings I argue that Popper much like Wittgenstein previously has been misconstrued as an Anglo analytic philosopher This book provides an interpretation of Popper s mature philosophy within his Central European intellectual context The aim of which is to open up a fruitful line of investigation into Popper s thought that I hope would continue over the coming years Alexander Naraniecki has spent time at the Popper Archives at the University of Klagenfurt in Austria whilst researching for this book He has also been a visiting scholar at Duke University and has completed a postdoctoral research fellowship at Deakin University in Melbourne Dr Naraniecki also publishes on issues relating to multiculturalism globalization cosmopolitanism as well as inter cultural relations and dialogue He has published on Popper in various leading

Science of Logic Georg

Wilhelm Friedrich Hegel, 2022-11-13 Georg Wilhelm Friedrich Hegel's Science of Logic is a profound exploration of the nature and development of logic as a dialectical process. Written in the early 19th century, the text reflects Hegel's philosophical project to reconcile ideas of contradiction and unity, where he meticulously dissects traditional logical structures. Employing a dense yet methodical style, Hegel transforms logic from a mere tool for scientific inquiry into an organic system that captures the dynamic and evolving nature of reality itself. Notably, the work offers a systematic account of concepts such as being, essence, and notion, thus situating itself within the broader context of German Idealism. Hegel, a pivotal figure in Western philosophy, was deeply influenced by the tumultuous socio-political landscape of his time, particularly the aftermath of the French Revolution. His engagement with metaphysics and epistemology paved the way for this foundational work, as Hegel sought to articulate a comprehensive framework that accounted for human thought and its evolution in the face of historical development. His intellectual environment, steeped in Enlightenment ideals yet marked by emerging contradictions, directly shaped the themes present in Science of Logic. This seminal work is recommended for readers keen on understanding the intricacies of Hegelian thought and its enduring impact on contemporary philosophy. With its ambitious scope and innovative treatment of logic, Science of Logic challenges readers to reconsider the relationship between thought and reality, making it an essential read for students of philosophy, logic, and even the social sciences. Man in the Place of the Gods

Frederick Cookinham, 2016-04-16 WHO SAYS SECULAR PEOPLE CAN'T BE SPIRITUAL? What do cities mean to you? Excitement, Dreams, and goals. Glamor, Escape, Danger, Romance. Artistically planned parks, zoos, and museums. Shopping. Oh my god, skyscrapers and bridges. Gershwin's Rhapsody in Blue. From Aristotle to Ayn Rand, writers have analyzed and gloried in cities as the greatest expression of Man, the rational builder and inventor. Architecture, especially, makes the city the temple of Rational Man. Frederick Cookinham is a New York City tour guide specializing in New York's colonial and Revolutionary history, and in AYN RAND'S NEW YORK. In THE AGE OF RAND, Cookinham taught you to see the landscape through history glasses. Now learn to see cities through temple glasses. See the spiritual in the secular. Be uplifted by the sight of Man's achievements. Make the city your temple to Man's mind, and don't be afraid to get all Ayn Rand about it. Appreciate better the deeper meanings behind the concrete and steel facts of where you live. Analysis and insight on Ayn Rand's life and work embedded in a guide to New York's architecture and public art, wrapped in a paean to cities, how they work and what they mean to us.
