

Plowden's endorsement of good practice

- In both its title and opening words the Plowden Report declared its child-centred philosophy, which its authors believed was synonymous with 'good' primary practice. Thus the Report serves as both a description and endorsement of child-centred approaches to the education of young children.
- The Committee's justification for this standpoint was that they believed child-centred approaches were the most effective means of achieving the aim of responding to the individual needs of pupils that had first been aired in the Hadow Reports, but had (the Committee believed) been undermined by the particular educational practices that resulted from the 1944 Education Act. The Report presented its interpretation of 'good' primary practice to respond to popular concerns that primary education had no clearly articulated or shared philosophy, and was consequently being adversely 'overshadowed' by debates about secondary education.
- 'In the past many primary schools have 'worked' to the 11+. If it has not been their Bible, it has often been a taskmaster. It sets up minimum standards for the abler children, often in our view the wrong ones, and distorting in their efforts on the curriculum. But at least they were standards. The teachers and parents had some yardstick by which to measure their pupils' work. Now it is going, how are they to know what to expect of children? These are among the problems we discuss.'

The Plowden Report Summary:

Being Skilled Stuart McNaughton, 2017-11-03 Originally published in 1987 *Being Skilled* presents a new model of how children learn to read and in particular those who learn quickly and precociously Bringing together ideas from such diverse sources as cognitive and developmental psychology and behaviour analysis perspectives on learning Stuart McNaughton has produced a more complete theory based on a study of homes and classrooms and the characteristics of reading behaviour in these settings Within this theory reading is seen as a symbolic skill with structural properties that partly determine development but it is also a social practice in which learning is achieved through problem solving and the performing of tasks set by particular environments Drawing on extensive research carried out in Britain North America and Australasia McNaughton examines how interactions between teacher and child direct the task of learning to read and how the relationship between home and school can be a well matched or a poorly matched setting in which learning may occur *Being Skilled* will appeal to advanced students researchers and theorists in education and development psychology and to anyone interested in the learning of complex skills

Child-Centred Education Christine Doddington, Mary Hilton, 2007-09-27 Against an increasingly authoritarian background of testing and instruction concern is growing about disengagement and loss of depth and quality in education at all levels *Child Centred Education* seeks to explore the role of Primary education within this debate The book will inspire teachers and head teachers seeking to make their practice more genuinely educational The authors capture the current opinion that primary schools can begin to reclaim some of their autonomy be innovative and become more creative Based on wide ranging research the book sets out to revive the creative alternative to the rigid and impoverished learning experienced by too many primary school children The authors Trace the origins and history of the child centred tradition Set out its fundamental beliefs and values Explore its place in education today This book is for teachers school governors local authority officers undergraduate and postgraduate teacher training and professional development courses
