The Pocket Of Neanderthal Vociferation English Edition:

The Pocket Book of Neanderthal Vociferation Paul Richard Scott, 2010-03-16 Life is a journey to be enjoyed not endured but sometimes it s just so difficult to tell the difference between the two Mine went from Manor Lane Infant and Junior School through an alcoholic daze and down the Rabbit hole to a small village in Ukraine See what you make of it all I m baffled **Neanderthal** ,2001 Neanderthal John Darnton,1996 When a Harvard paleontologist disappears in the mountains of Asia Matt Mattison and Susan Arnot are sent to find him and continue the search for man s missing link that they believe is alive in the mountains Neanderthal Journeys: (pocket Size Mini Series) Keith Argyle,2018-12-24 This novel is based around the period of 30 000 40 000 years ago at about the period when the Neanderthals were thought to have either died out or interbred with the Homo sapiens that were becoming the more dominant species It has been strongly suggested that by interbreeding the stronger human gene eventually bred out the Neanderthal race It s also been proven by DNA that the human race obtained our immune system from the interbreeding with Neanderthals Although some of the peoples of the world seem to have developed independently by breeding with other races the Neanderthals survived longer than any other race on earth It is believed that they walked the earth for up to 300 thousand years or more before the humans or Homo Sapiens races took over the world s stage I have been a little inventive within this novel that suggests how the Neanderthals could have progressed to more advanced places to live and used better weapons we give them credit for I have thought out how they could have begun to use better weapons like bows and arrows and how to build simple huts to comfortably live in and move out of the caves You might think my ideas are a little fanciful but I feel that we underestimate the Neanderthal intelligence According to biologists the Neanderthal brain was bigger than ours by the size comparison of a snooker ball If this is the case then why did the Neanderthals live in caves all the times of their existence I have proposed by simple ingenuity that certain ones were beginning to think things out and had the use of imaginary and evolutionary thoughts of invention and at some point began to live in dwellings other than caves In my story Cuda the main character has an inventive mind and is inspired by observing things that spark off new ideas and revolutionary changes for the Neanderthals to live by I have suggested that due to an accident when his mother was carrying him as a baby that she had a fall and thought she was going to lose him but he survived His mother and father were pleased when he grew up healthy and noticed there was something different about him he had a different way of thinking Could his mother s fall have anything to do with Cuda being different in his thought patterns Could something like this have happened for real in the time of the Neanderthals that suddenly changed the way they lived and hunted This is only a theory but just as good as any others proposed In modern day we hear of such things happening that causes a person or child to suddenly become a genius I have read several stories where accidents and injuries have sparked off things in the human brain that has took our technology a stage further Genius is more common that we might think you don t have to be a mathematician like Einstein to be a genius even though he came

up with the formula to revolutionize space and time he was also dyslexic I admire people like Albert Einstein Steven Hawkins and others like them I hope this novel gives you food for thought happy reading and please leave your feedback if you download it from Amazon Kindle or buy the paperback version Feedback helps authors know if they are getting things right for their readers Thank you Keith Argyle It is also available through Amazon Prime
