The Political Economy of Hungary Adam Fabry, 2019-04-03 This book explores the political economy of Hungary from the mid 1970s to the present Widely considered a poster boy of neoliberal transformation in post communist Eastern Europe until the mid 2000s Hungary has in recent years developed into a model illiberal regime Constitutional checks and balances are non functioning the independent media trade unions and civil society groups are constantly attacked by the authorities there is widespread intolerance against minorities and refugees and the governing FIDESZ party led by Prime Minister Viktor Orbán controls all public institutions and increasingly large parts of the country's economy To make sense of the politico economical roller coaster that Hungary has experienced in the last four

decades Fabry employs a Marxian political economy approach emphasising competitive accumulation class struggle both between capital and labour as well as different fractions of capital and uneven and combined development The author analyses the neoliberal transformation of the Hungarian political economy and argues that the drift to authoritarianism under the Orb n regime cannot be explained as a case of Hungarian exceptionalism but rather represents an outcome of the inherent contradictions of the variety of neoliberalism that emerged in Hungary after 1989

the audiovisual and financial markets exists and considers the perspective of both audiovisual companies and financial intermediaries Providing a thorough overview of the audiovisual industry in three major categories television cinema and web it analyses the financing behind each The author adapts the traditional assessment methods to include exploitation rights distribution deals and risk determinants he also proposes a pricing model for the audiovisual products demonstrating that prices and values in a industry of prototype goods do not depend solely on cost and revenue The book also includes a methodology for analysing the economics of the sector the different sales agreements between broadcasters and the distribution deals between distributors and independent producers Finally a description of the main financial products for private finance is provided as well as an explanation of how public funds can act as leverage to catalyze private resources through the use of guarantee funds In *The Economics of the Audiovisual Industry* the author suggests that rather than relying on subsidized public support the audiovisual industry should foster private public partnerships and market dynamics to promote an alternative funding model based on a profitable and long lasting connection between the audiovisual and financial markets The valuation model both for products and firms proposed in this book are at the basis of this new approach

Prime Ministers in Central and Eastern Europe Florian Grotz, Jan Berz, Corinna Kroeber, Marko Kukec, 2025-01-12 Prime Ministers PMs are the most influential powerful and visible politicians in parliamentary democracies Their prominent role has been increasing in Western democracies due to the presidentialization of politics But is this also true for new democracies such as those in post communist Central and Eastern Europe CEE As politics in CEE has been characterized by high personalization weak voter party linkages and strong media influence of political leaders prime ministerial performance may be even more important for the functioning of parliamentary democracy in those countries At the same time conventional wisdom suggests that prime ministers in CEE perform weakly because they lack political experience and operate in an extraordinarily difficult context but this assumption has not been systematically examined To close this research gap this book presents a new conceptual approach to measuring prime ministerial performance and offers a novel dataset of 131 cabinets in eleven CEE countries between 1990 and 2018 The comparative analyses of this data reveal that the political experience of post communist prime ministers varies considerably they range from politically inexperienced outsiders to insiders with long standing careers in parliament government and

party leadership At the same time multivariate analyses of the quantitative data and qualitative cases demonstrate that variations in the careers contexts and performance of prime ministers are systematically connected In this way the book not only qualifies conventional assumptions about prime ministers in CEE but also substantiates the theoretical relationship between their careers contexts and performance Prime Ministers in Central and Eastern Europe thus contributes to an enhanced understanding of the functioning of post communist democracies and provides new insights for scholarly work engaging with political leadership
